USER MANUAL

KEEP THIS USER MANUAL FOR FUTURE NEEDS

Thank you for your patronage!

We are confident that our excellent products and service can satisfy you.

For your own safety, please read this user manual carefully before installing the device.

In order to install, operate, and maintain the lighting safety correctly.

We suggest that the installation and operation should be done by the verified technician and follow the instruction strictly.

CAUTION!

Keep this device away from rain and moisture!

CAUTION!

Unplug mains lead before opening the housing!

Every person involved with the installation, operation and maintenance of this device has to:
-be qualified

-follow carefully the instructions of this manual

INTRODUCTION:

Thank you for having chosen this professional moving head.

You will see you have acquired a powerful and versatile device.

Unpack the device. Inside the carton box you should find:

1. One power in cable&power out connector optional
2. One 3Pin DMX cable
3. Two mounted brackets
4. One safety rope
5. One English user manual

(Flight case, Clamps are optional, please contact your dealer)

Please check carefully that there is no damage caused by transportation. Should there be any questions, please consult your dealer and don't install this device.

GENERAL GUIDELINES

This device is a lighting effect for a professional use on stages, TV, in discotheques, theaters, etc.,
The device was designed for indoor use only.

This fixture is only allowed to be operated with the max alternating current which stated in the technical specifications in 6th page of this manual.

Lighting effects are not designed for permanent operation. Consistent operation breaks may ensure that the device will serve you for a long time without defects.

Do not shake the device. Avoid brute force when installing or operating the device.

While choosing the Installation-spot, please make sure that the device is not exposed to extreme heat, moisture or dust. Please don't project the beam onto combustible substances. The minimum distance between light-output from the projector and the illuminated surface must be more than 0,5 meter.

If you use the quick lock cam in hanging up the fixture, please make sure the quick lock fasteners

turned in the quick lock holes correctly.

Operate the device only after having familiarized with its functions. Do not permit operation by persons not qualified for operating the device. Most damages are the result of unprofessional operation.

Please use the original packaging if the device is to be transported.

For safety reasons, please be aware that all modifications on the device are forbidden. If this device will be operated in any way different to the one described in this manual, the product may suffer damages and the guarantee becomes void. Furthermore, any other operation may lead to short-circuit, burns, electric shock, crash, etc.

SAFETY INSTRUCTIONS

CAUTION!

Be careful with your operations. With a dangerous voltage you can suffer a dangerous electric shock when touching wires!

This device has left the factory in perfect condition. In order to maintain this condition and to ensure a safe operation, it is absolutely necessary for the user to follow the safety instructions and warning notes written in this user manual.

1. In order to guarantee the product's life, please don't put it in the damp places or even the environment over 60 degrees.

2. Always mount this unit in safe and stable matter.

The qualified professionals are allowed to carry out the lamp installation, operation and maintenance, but they must guarantee to operate in strict accordance with the instructions referred to.

▲ Important:

Damages caused by the disregard of this user manual are not subject to warranty.

The dealer will not accept liability for any resulting defects or problems.

If the device has been exposed to temperature changes due to environmental changes, do not switch it on immediately. The arising condensation could damage the device. Leave the device switched off until it has reached room temperatures.

This device falls under protection-class I. Therefore it is essential that the device be earthed.

The electric connection must carry out by qualified person.

Make sure the power cord is never crimped or damaged by sharp edges. If this would be the case, replacement of the cable must be done by an authorized dealer.

Always disconnect from the mains, when the device is not in use or before cleaning it. Only handle the power cord by the plug. Never pull out the plug by tugging the power cord.

During initial start-up some smoke or smell may arise. This is a normal process and does not necessarily mean that the device is defective, it should decrease gradually.

Please don't project the beam onto combustible substances.

If the external flexible cable or cord of this luminaire is damaged, it shall be exclusively replaced by the manufacturer or his service agent or a similar qualified person in order to avoid a hazard.

CAUTION!

Never touch the device during operation!

The housing may heat up!

CAUTION!

Never look directly into the light source,

As sensitive persons may suffer an epileptic shock.

Please be aware that damages caused by manual modifications to be the device are not subject to warranty. Keep away from children and non-professionals.

CLEANING AND MAINTENANCE

1. To reduce the risk of electrical shock or fire, do not expose this unit to rain or moisture.
2. Do not spill water or other liquids into or on to your unit.
3. During long periods of non-use, disconnect the unit's main power.
4. It should be installed in a well-ventilated place, at a distance of 50 centimeters or more with the walls. At the same time, please check if the fan and ventilation holes are unobstructed.

The following points have to be considered during the inspection

- 1) All screws for installing the devices or parts of the device have to be tightly connected and must not be corroded.
- 2) There must not be any deformations on the housing. Fixations and installations spots(ceiling, suspension, trussing).
- 3) Mechanically moved parts must not show any traces of wearing and must not rotate with unbalances.
- 4) The electric power supply cables must not show any damage, material fatigue or sediments. Further instructions depending on the installation spot and usage have to be adhered by a skilled installer and any safety problems have to be removed.

CAUTION!

Disconnect from mains before starting maintenance operation!

In order to make the lights in good condition and extend the life time, we suggest a regular cleaning to the lights.

- 1) Clean the inside and outside lens each week to avoid the weakness of the lights due to accumulation of dust.
- 2) Clean the fan each week.
- 3) A detailed electric check by approved electrical engineer each three month, make sure that the circuit contacts are in good condition, prevent the poor contact of circuit from overheating.

We recommend a frequent cleaning of the device. Please use a moist, lint-free cloth. Never use alcohol or solvents.

TECHNICAL PARAMETERS

Voltage: AC100~240V 50/60HZ

Power: 500W

Lamp beads: 12pcs 40W 4in1 LED beads, 72pcs 0.3W Golden LED beads, 72pcs 0.3W White

Control mode: DMX512, self-propelled, master-slave, voice control, with RDM function.

Channel: CH23, CH28, CH35, CH57, CH71, CH117

Dimming: 32bit 0~100% linear dimming

Features: Y moving head + beam + strobe + fill light

Working temperature: -30°C~50°C

Strobe frequency: 1~30HZ

Appearance: Metal, Black

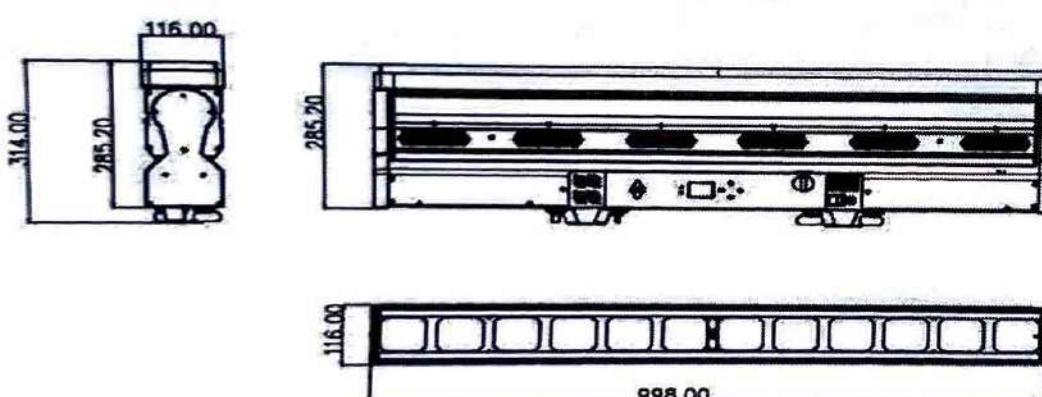

Connection mode: DMX512 input and output / power input and output.

IP rating: IP20

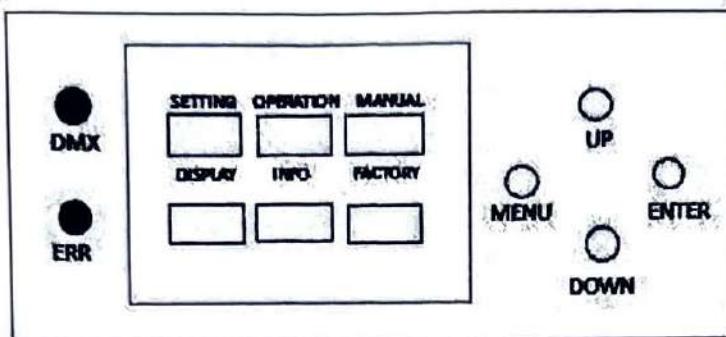

Package size: 110*20*36CM(carton 1in1)

Weight: 18KG

Fixture Size

Display panel and button definition

menu: Enter/return to main menu

UP: Menu function upward selection/parameter increment

DOWN: Menu function down selection/parameter decrement

Enter: Select the menu function, and confirm and save when the menu function parameters are modified.

Menu Function

After turning on the power and resetting the whole machine, press the menu key to enter the main menu (the main menu interface will exit after 30 seconds of no operation), see the main menu function table for details (a total of 5 main menu options); press the up or down key to select the main menu, Enter the key to enter and modify the function parameters of each menu, and then press the key to save the current function parameters after modification (with power-off memory after saving).

MENU	SUBMEN	MENU FUNCTION DESCRIPTION
System settings	DMX Address	Modify the DMX address code up or down (the address code range is 001-512), press the confirm key to save, and the default is 001.
	Encoder	Up or down to modify the encoder on/off, press the confirm key to save, and it is on by default.
	Pan Reverse	Modify the X inversion up or down to enable/disable, confirm the key to save, and the default is disabled.
	Tilt Reverse	Up or down to modify the Y inversion on/off, press the confirm key to save, the default is off.
	Advanced settings	
Operation mode	operating mode	Up or down to select the operation mode DMX/voice control/automatic, press the confirm key to save, and the default is DMX.
	channel selection	Up or down select the channel CH24, CH28, CH35, CH57, CH71, CH117 to confirm the key to save, the default is CH24.
Manual control	Tilt	Modify the parameter value up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	Tilt fine	Modify the parameter value up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	Tilt Speed	Modify the parameter value up or down (adjustable range 000-255), press the confirm key to save, the default is 000.

	Zoom	Modify the parameter value up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	Dimmer	Modify the parameter value up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	A Strobe	Modify the parameter value up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	A Red	Modify the brightness of the red lamp bead up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	A Green	Modify the brightness of the red lamp bead up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	A Blue	Modify the brightness of the red lamp bead up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	A White	Modify the brightness of the red lamp bead up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	A Model	Modify the parameter value up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	A Speed	Modify the parameter value up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	A Background	Modify the parameter value up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	A Background Dimmer	Modify the parameter value up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	B Strobe	Modify the parameter value up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	B Golden	Modify the brightness of the green lamp bead up or down (adjustable range 000-255), press the confirm key to save, the default is 255.
	B White	Modify the brightness of the green lamp bead up or down (adjustable range 000-255), press the confirm key to save, the default is 255.
	B Model	Modify the parameter value up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	B Speed	Modify the parameter value up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	B Direction	Modify the parameter value up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	B Background	Modify the parameter value up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	B Background Dim	Modify the parameter value up or down (adjustable range 000-255), press the confirm key to save, the default is 000.
	Reset	Yes/No
Display setting	Language selection	Select Chinese/EN (English) up or down, press the confirm key to save, and the default is Chinese.
	Invert setting	Select up or down to turn off/on the inverted display setting, press the confirm key to save, and the default is off.
	Screen saver	Select up or down to turn off/on the screen saver, press the confirm key to save, and it is turned on by default.
	Software version	069C program identification code, which cannot be modified.

Factory settings	Show please enter the password! Change it up or down to 138, and then press the confirm key to enter the factory setting..	Tilt calibration	Modify the parameters up or down (range 000-255), press the confirm key to save, the default is 128.
		Focus 1 Calibration	Modify the focus 1 calibration (000-255) up or down, press the confirm key to save, the default is 128.
		Focus 2Calibration	Modify the focus 2 calibration (000-255) up or down, press the confirm key to save, the default is 128.
		Focus travel	Modify the parameters up or down (range 000-255), press the confirm key to save, the default is 128.
		Red	Modify the red lamp bead current (032-255) up or down, press the confirm key to save, the default is 252.
		Green	Modify the current of the green lamp bead up or down (032-255), press the confirm key to save, the default is 252.
		Blue	Modify the blue lamp bead current (032-255) up or down, press the confirm key to save, the default is 252.
		White	Modify the white lamp bead current (032-255) up or down, press the confirm button to save, the default is 252.
		LED Num	Select 000/0012 up or down, press the confirm key to save, and the default is 001.
		Electric current	Select 000/007 up or down, press the confirm key to save, and the default is 004.
		Speed	Select 000/007 up or down, press the confirm key to save, the default is 000.
		LOGO	L Up or down to select 000/001, press the confirm key to save, the default is 000.
		Temperature	Modify the temperature parameter up or down (range 40-70), press the confirm key to save, the default is 065.
		Temperature-Fan	Select up or down to turn off/on temperature-fan control, press the confirm key to save, and it is turned on by default.
		LED	Select LEDA/LEDB in order of LED lamp beads
