

## **INTERNATIONAL SERVICE CENTER**

## Zhejiang Huaqi Zhengbang Automation Technology Co., Ltd.

Zhejiang Huaqi Zhengbang Automation Technology CO., Ltd. (Wenzhou Zhengbang Electrical Equipment CO., Ltd.) is founded in 2007, focusing on developing, design, manufacturing and sales automatic manufacturing devices and electronic production equipment. The company supplies professional and individual solutions for LED lighting, electronic, electrical products, toys, metal, cars. Major products are LED lighting automatic assembly lines, THT soldering device, SMT soldering machines and multiple working tables and non-standard equipment. Major products are LED bulb automatic assembly lines, flood lights assembly lines, downlights assembly lines, THT soldering equipment, SMT soldering device, working table and non-standard customized machines. Huaqi Zhengbang has big scale market covering 30+ province and districts inside of china and 30% products are selling to Hongkong, Taiwan, Southeast Asia, Africa, Europe, and America.

Huaqi Zhengbang believes "Qualified Base, Market Leading, Technical Development, Profitable Management" company role in order to improve core competitiveness, providing qualified service to most clients with "Qualified Products, Reasonable Pricing, Excellent Reputation and full range after-sale service"

**COMPANY VISION:** Contributing to create Chinese first brand in electronic and electrical production equipment.

## SMT/Solder Paste Mixer

## **Product Introduction**

ZB500S Automatic Solder Paste Mixer makes solder cream move downward constantly through centrifugal force generated by revolution and cooperation with energy from rotation at 45 degree angle of axis of revolution. Solder cream located in the tank bottom makes upward movement from the surrounding, which forms a tornado-funnel shaped stirring action, and it can stir, soften and defoam the solder cream with appropriate viscosity. Solder cream has good wettability, even diffusivity, excellent printing effect after mixing, which achieves the best welding performance when reflowing soldering.

## SMT/Solder Printing Table

#### **Product Introduction**

ZB3040H high precision stencil printer is mainly designed for the requirement of the single or double-side PCB soldering paste and red glue printing, the working platfore is processed by cellular positional hole with high-quality aluminum and the pedestal is soldered by thick steel plate, steadiness and durability.

## SMT/Semi-Auto Solder Printing Machine

## **Product Introduction**

The main frame of ZB series semi-automatic solder paste printing machine adopts rigid structure, and the universal honeycomb cast aluminum table top realizes precise positioning of single-sided and special-shaped plates with high repeatability. The whole machine adopts PLC control system, Omron sensor and full color touch screen. The system is more stable and easy to operate. This product is suitable for solder paste and red glue printing on circuit boards, and is an indispensable equipment in the production process of SMT automated production line.

## SMT/Automatic Loading/Unloading Machine

## **Product Introduction**

The ZB series loader and unloader is used for PCB transfer at the beginning of SMT production line and PCB receiving and storage at the end of production line to the PCB rack. This machine adopts PLC programmable control system with ball screw, and the whole machine runs stably and accurately. The operation control panel adopts a true color touch screen, which is intuitive and easy to use. It is suitable for repeated transportation of single-sided or double-sided circuit boards, which greatly reduces labor costs and improves

## SMT/Automatic Pick and Place Machine

## **Product Introduction**

ZB series placement machine main features: Small volume, easy operate, run stable and price affordable. They can mount 0402, 0603, 0805, 1206, 1210, 3528, 5050, SOP and QFN etc chips precise. These machines can help to avoid the unstable performance because of manual mounting and reduce the rent cost, improve the product capacity at the same

## SMT/Automatic Vision Pick and Place Machine

## **Product Introduction**

The ZB series mounter is suitable for small and medium-sized enterprises' mass production, experimental development, sample trial production and school teaching and so on. The design concept of the machine is to meet the needs of the vast number of small and medium customers, with the rapid and accurate mounting, easy operation, stable running and affordable price. It has a very high performance-price ratio and is your best choice!

## SMT/Automatic Vision Pick and Place Machine

## SMT/Automatic Vision Pick and Place Machine

#### **Product Introduction**

The ZB3245TSS series mounter with 2heads ,can pick and place at the same time. Independent 54 feeder station, 19"Dell display, multiple sets of high resolution CCD industry dual camera vision. The transmission mechanism is equipped with high precision synchronous belt.and Linear Guideway, stepping servo motor.support CSV. document edit.Maximum PCB 320\*450mm, suit for general resistance capacity LED lamp bead and IC components easy operation, This machine is designed for small amount PCB production ☐ like R&d design, experimental teaching etc.

#### **Product Characters**

Collocate the Stepper Servo High Resolution Ratio CCD

54 Feeder Station, Meet Different Kinds of Mounting Requirements

**Dual-Calibration Solution** Brings Efficiency and Accuracy

**Built-in Industrial Control** PC and Windows System, Easy to Operate, Stable Performance

## **Specification**

| Model               | ZB3245TSS                               | X/Y Axis Moving Range         | 430×530mm                       |
|---------------------|---|-------------------------------|---------------------------------|
| Mounting Numbers    | 2PCS                                    | Z Axis Moving Range           | 10mm                            |
| Mounting Precision  | 0.025mm                                 | Z Axis Rotation Angle         | 0 ~ 360°                        |
| Mounding Angle      | 0 ~ 360°                                | Visual Camera                 | CCD High-definition Camera      |
| Mounting Speed      | 5500                                    | Numbers of Visual             | Parts Camera×3、PCB Camera×1     |
| Suction Nozzle Type | Juki Series Nozzle                      | Recognition Capability        | MAX. 22×22mm                    |
|                     | RC(0402、0603、0805、1206 etc)             | PC System                     | Microsoft WIN7                  |
| Applicable Element  | LED Lamp Beads(0603、0805、3014、5050 etc) | Operational Software          | R&D                             |
|                     | Chip(SOT、SOP、QFN、BGA etc)               | Compatible File Format        | CSV. Format                     |
| SMD Height          | ≤5.5mm(Customize ≤11mm)                 | Program Method                | Support Online and Offline Ways |
| PCB Minimal Size    | 10×10mm                                 | Air Pressure                  | 0.4Mpa                          |
| PCB Maximum Size    | 320×450mm                               | Vacuity Degree                | -66kpa                          |
| PCB Thickness       | ≤2mm                                    | Power                         | 230W                            |
| Туре                | 8mm、12mm、16mm、24mm、32mm                 | Power Supply                  | AC220V±10% 50Hz                 |
| Front IC Location   | 10PCS                                   | Main Engine Outline Size      | L990×W730×H375mm                |

# ZB3545TP I ZHENG BANG = 10 % Ю

#### **Product Introduction**

PC monitor, 19 inch Dell display. It is with Multi-group industrial CCD camera solution, identification and correction system, 4 head pick and place at the same time. For the transmission structure, machine with HIWIN linear guider, Japanese belt, can acheive longterm high precision and stable mounting. Maximum support 38 pcs of 8mm YAMAHA CL feeder stations. Also CSV.TXT coordingate file can be adopted. The maximum PCB size, allowed: 350\*450mm, normally it is used for normal resistance, capacitance LED, chips, I .BGA.etc.Mainly used for small production and prototyping business, with self-designed operating system for developers

## **Product Characters**

Step servo system was adopted to improve the machine reliability and never loose step.

Multi-grouped industrial CCD camera solutions are adoped to improve efficiency and precision.

HIWIN Linear Guide generates long term of high precise performance.

To improve the machine adaptability, it is adopted 4 head synchronous identification and mounting solution.

## SMT/Automatic Vision Pick and Place Machine

#### **Product Introduction**

Zb4050 mounting machine adopted built-in WIN7 system industrial control computer, eight sets of high-resolution CCD industrial camera vision correction system, online 6-head synchronous calibration production placement. The transmission mechanism is equipped with Panasonic high-resolution servo drive and motor, silver linear guide, and TBI ball screw to maintain long-term high-precision and stable placement. 64 PCS of YAMAHA pneumatic feeder station, support CSV coordinate file import and editing, maximum 500\*400mm PCB placement. It is suitable for high-precision placement of conventional resistance, LED lamp beads, IC, BGA and other components, suitable for automated mass production.

## **Product Introduction**

ZB series reflow furnace is mainly for the production and maintenance of SMT products such as desktop solder reflow equipment. The product uses high efficiency far infrared heating elements and distributed thermocouple temperature measurement device. Through the microcomputer's precise control, the temperature of the reflow oven curve control can be more accurate, and the temperature of the reflow plane can be more uniform. ZB series reflow furnace is fully able to adapt to a variety of different alloys and lead-free solder reflow requirements. Its temperature curve precision can be adjusted; in addition, this kind of equipment also has automatic fault detection alarm and other functions.

## SMT/Reflow Oven

## **Product Introduction**

ZBHW330 reflow soldering adopts infrared radiation heating, which is suitable for the production of small batches of single circuit boards. ZBRF530, ZBRF630 and ZBRF830 reflow soldering all use stainless steel heaters which are resistant to high temperature and corrosion, combined with the hot air circulation system to make full use of heat, rapid heating and high thermal efficiency. Accurate and stable temperature control, suitable for SMT small and medium batch production welding.

## **Product Characters**

- PID temperature control system, with precise and stable temperature control.
- Hot air circulation system, heating up quickly and evenly, with high thermal efficiency.
- Infrared radiation heating, with rapid heating and high efficiency
- Stainless steel furnace i, with environmentally friendly and has no peculiar smell

PID Micro-Computer Fully Temperature Control System

Full-Color HMI Human-Computer Interface(Touch Screen)

Liner Hearth Use Industrial Grade Anti High Temperature and Corrosion Panel Paint

Four 4 Zones Special Temperature Control mode More Stable and Precise

Super Anti-temperature Fan

High-Efficiency Energy-Saving Heating Tube

## SMT/Reflow Oven

## **Product Introduction**

ZBRF series reflow soldering machine use M type stainless steel dryer wxpansion evaporator heating tube anti corrosion and high temperature, longer serve life, high heat efficiency. Cooperating with hot air circulation system, the heat storage structure allows the heat to be fully used. The multi-layered heat insulation structure minimizes the loss of heat. Temperature is control by the PID closecycle which provide high precision temperature control.

## **■ Product Characters ≥**

- Super anti high temperature fan.
- Temperature is PID close-cycle control.
- ◆ Liner hearth use industry anti-corrosion and high temperature resistance, the paint temperature up to 800 grades.
- ◆ Liner use import high temperature plastic powder-spray to ensure liner hearth and inner welding atmosphere non pollution.
- Each temperature zone instrument and transfer adjust external, which is convenient for customers to test the liner hearth.

It Could Custom Delayed Shutdown Time, Protect the Soldering Pot and Transfer Components Not Been Deformation.

# SMT/Online Reflow Oven ZBRF-835 ☑3 温州市正邦电子设备有限公司 ZBRF835 ZBRF-1235 ☑25 温州市正邦电子设备有限公司

## **Product Introduction**

ZBRF series Online reflow oven supports two transmission modes: mesh and conveyor, and can be connected to the pick and place machine and the PCB loader and unloder machines to realize automatic welding. This series of products have the characteristics of high efficiency, connectivity, and low investment. The heaters use of high-efficiency and energy-saving finned heating tubes, combined with the hot air circulation system, makes full use of the heat evenly distributed, and improves the welding effect. The split fume exhaust furnace is more effective to eliminate the fumes generated during the welding process.

## 

## **Product Introduction**

ZB series heating table is kind of stable heating equipment, which apply to any atmosphere of stable temperature heat eg: Aluminum panel LED bead welding, PCB pre-heating, propolis&point glue, mould and mold core preheat, chemical experiment, heat and solidify, solid-state relay chips welding etc atmosphere, easy to operate and high working efficient, which is your production good helper.

This machine use high efficient heating tube multi-tube technology as heating unit connect with high quality aluminum board, heating tube is convenient to exchange, and heat transfer even, extremely high conduction efficient; Temperature controlled by PID, temperature controlled accurate, attractive appearance.

## **Product Characters**

PID Intelligent Temperature Control Precision Temperature Control Auto-constant Temperature

High Precision Stainless Steel Heating Tube Quick Heating Up Low Power Consumption Long Life Time

Reflect Thermal-protective Coating High-temperature Thermal-protective Reduce Loss

Vertical Heat Emission Hole Multi-aspect Heat Emission Promise the Engine-box Temperature

## **Product Introduction**

The ZB series docking station adopts the sturdy aluminum profile design and the thickening of the fuselage to improve the stability of the whole machine, and it will not be deformed for a long time. The precision screw adjustment seat makes the parallel width adjustment smoother. Modular design and user-friendly interface, easy to use. SMEMA standard signal cable that can be used directly with other devices. Applicable to the connection between SMT automatic production line equipment, can also increase the feasibility of special process locations.

## **Product Introduction**

The PCB Separator can further improve the quality of PCB separate. It is suitable for cutting all kinds of PCB, SMT board, aluminum substrate board, LED board and LED light bar with V groove, Import high speed steel blade, long life span, It mainly applies to LED industry, SMT industry, mobile phone /MP3 industry, electric toy sweat, various electronic industry, and other industries using circuit boards.

## **What's the difference between B and D type?**

B type is using 304 stainless steel material for tin tank, D's tin tank is using the military-grade titanium, D type is more anticorrosion, high temperature resistant, longer life, B type is just for ordinary tin bar, but D type is apply to any types of tin bar, even for the lead, so the D type is more cost-effective.

**U** Type

## **Product Introduction**

ZB Series flux spraying machine is the ideal machine that before PCB soldering ,operate simply and efficiently.

- \*The low pressure flux spraying machine apply to small PCB size and small customers.
- ◆The high pressure flux spraying machine apply to big PCB size and big customers.

## **Product Characters**

- Soldering flux is finer grains, atomization effect is more ideal.
- It's help to improve the flux activity.
- Soldering flux spray uniform, reduce spatter the tin effectively.
- 304 stainless steel spray tank with anti-corrosion and not easy oxidation.

## THT/Semi-Auto Dip Soldering Machine

#### **Product Introduction**

ZB series semi-automatic soldering machine use mechanical arm equipment to spray the scalding powder, PCB pre-heating, soldering, cooling, smoking and tin splash collection functions: It's apply to long and short plug-in elements and different PCB soldering requirement; soldering spot full, smooth, it's the cost-effective soldering equipment.

#### The Special Upgrade:

Automatic induction spray upgrade: guicker and high efficiency.

Self-suction electromagnetic pump upgrade: convenient to operate and reliable quality.

Hight precision nozzles upgrade: particle thinner and atomization better.

## **Product Characters**

Self-Suction Electromagnetic Pump

Heat-up Fast

Soldering Spot Full

PID Intelligent Temperature Control

- Newly automatic induction spray system, quicker and higher efficiency, no need manual operation.
- Using newly precision spray nozzle, spraying partical thinner and even, better atomization effect.
- \* High-efficiency pre-heat drying, speed up the circuit board scalling powder volatilize and activation of molecules, fully exert the scaling powder capability.
- Temperature controlled by the temperature control instrument, show the setting temperature and actual temperature at current time.Range of temperature control: Normal temperature -400°C. Main features: constant temperature ,precision
- Discharging plate and cooling completed for only one time, forced cooling by super calm wind mechanism, equipped with exhaust device inside, which can delete the harmful gas produced in the process of soldering.
- Equipped with tin splash collection groove, which is convenient and save the cost through tin splash secondary
- Fully making use of room inside the machine, which possess two big volume tool cabinet, practical and convenient. Need only one person to operate including install debug and maintain.

## THT/PCB Input/Output Machine

## **Product Introduction**

Wave soldering input connected machine apply to THT plugin line and wave soldering connected machine combine together for input, which the features including the speed can be adjustable, low noise and easy to operate. The stainless steel materials chain design make this machine wearable and beautiful apperance.

## THT/Blade Sharpner

## **Product Introduction**

ZB series sharpen machine is mainly use the blade of PCB cutting machine to grinding, this machine assembled by highprecision components, excellent motor and diamond grinding wheel, convenient, efficient, the grinding angle can adjustable; Diamond grinding wheel speeding faster, stable, low noise, cutting feeder rail stable and so on.

## THT/Pin Cutting Machine

## **Product Introduction**

ZB series cutting machine are apply to cut the extra pin after components and spares soldering, it's by the high precision process components assembled, grinding process at the key part, good cutting consistency, quick blade rotate speed, stable, low noise, high efficiency and convinent to operate. Double lead rails travel adjust same time and the height of wide cutting can be adjusted casually and cost-effective.

## **■ Product Characters ≥**

Using swiss imported high precision bearing,the blade shook just 0.3mm.

The machine is stable and imported bearing, 4500r/min, wire cutting not shook.
