1 About This Manual

The EF400 provides high quality features as a smart terminal using Bluebird's creative ideas and technological expertise. This user manual is designed to help users effectively operate the device.

- Please read this manual carefully before using the device for safe and proper use.
- This device may only be used in countries where it is sold.
- The components and colors of this device in this manual may differ from the actual product.
- Features and specifications are subject to change without prior notice.
- Content may vary by software version or by service provider.
- Apps and features may vary by country or region.
- Certain features of this device may have performance issues due to user environment, programs in use, or peripheral device usage. Bluebird is not liable for any issues caused by third-party apps or accessories.
- Modifying the device's operating system or installing software from unknown sources may cause device malfunction or data loss. Improper or unauthorized use of the device is a violation of the Bluebird license agreement and void your one-year limited warranty.

2.1 Symbols

This manual uses the following symbols to indicate hazards and additional information.

Symbol	Name	Description
	Warning	Indicates situations that could cause injury to yourself or others.
	Caution	Indicates situations that could cause damage to your device or other equipment.
	Note	Indicates additional information that can help you get the most out of the device.

Please read this safety precaution information carefully. Failure to follow the information provided may result in fire, electric shock, or other property damage or bodily injuries.

2.2 Device

- Do not press the Power button on the device if the device is wet or do not touch adapter or power cord with wet hands. There is risk of electric shock.
- Do not use your device in an explosive danger zone.
- If your device becomes wet, do not put your device in heaters, microwaves, etc. to dry it. There is a risk of explosion or malfunction.
- Do not scratch the device's touchscreen. Use only your fingers or a compatible pen. Never use an actual pen, or any other sharp object on the touchscreen.
- Although this device is very sturdy, do not drop, hit, bend, or sit on it on purpose. It can be broken.
- Do not modify, take apart, or repair the device. Contact to your customer service center. Failure to do so will void your warranty.
- Do not attempt to modify your hardware or software. It may cause device malfunction and void your warranty.
- You may not be able to use this wireless device in basements, open fields, skyscrapers, or other places where the signal is weak.
- Backup the data and information from your device. Your data, such as ringtones, texts, and voice messages, may be erased during repairs or upgrades.
- Do not paint your device. It can damage your screen or your device's exterior.
- Avoid using or storing this device at extreme temperatures. This device is designed to work at temperatures between -20°C and 60°C (-4°F and 140°F), and humidity level between 5% and 95%.

2.3 Environment

- Do not use the device while driving or operating heavy machinery. Doing so may result in death or serious injury.
- Do not use the device in locations with combustible goods. Doing so may result in an explosion.

- Do not use the device in dusty or hot locations. Doing so may damage the device.
- Do not expose your device to direct sunlight such as on the dashboard of a car for extended periods of time.
- Do not use the device in humid locations. Doing so may damage the device and void the warranty.
- Do not keep the device close to air conditioner vents. Corrosion within the device may occur due to condensation from changes in temperature.
- Do not allow children to play with the device.

2.4 Battery and Charging

- Improper battery use may cause fire, explosion, or other hazard.
- If the battery is removed due to impact, heat, submersion, or other damage, there is a risk of explosion. Keep away from children and animals.
- Do not allow the battery's contacts to touch things like necklaces, coins, or electric conductors. Do not give any impact with sharp objects. There is a risk of explosion.

- Use only the approved battery and charger. Using an incompatible battery or charger may cause device malfunction or other damage, such as fire.
- When you are not using the device for a long period, take out the battery and keep the device and the battery in a dry, cool place. Also, charge the battery at least once a year. If you keep it without charging for a long time, it may cause device malfunction.

2.5 Distraction

In some situations, using your device may distract you and cause serious injuries and damages. For example, avoid talking on the phone or texting while driving or riding a bicycle. It is strictly prohibited by law in some jurisdictions. If you cannot avoid using your device while driving, stop your vehicle or use hand-free kit.

2.6 Frequency Interference

- This wireless device may cause radio frequency interference, so use Airplane mode or turn off the device when prohibited.
- The device emits an electromagnetic fields. It may interfere with your medical devices.
- Do not place credit cards, phone cards, bankbook, and tickets next to the device. The magnetic field of the device can damage their magnetic strips.

3.1 Package Contents

The package includes:

EF400 device

Battery

Battery cover

Micro USB cable

- Both Windows and Android packages include same components as described above.
- The illustrations may differ from your actual items.
- To purchase additional accessories, contact your sales representative.
- You can download your User Manual from www.mypidion.com. The paper version may be available for some regions.

3.2 Your Device

3.2.1 Front

Windows and Android devices are same except for the touch buttons on the front of the devices.

No.	Name	Description
1	Receiver	Allows user to hear the person they are talking to while on the phone.
2	Charging LED	Indicates the status of the battery. The charging LED turns red when the battery is charging and turns green when the battery is fully charged.
3	Touchscreen	Displays apps and acts as a multi-touch interface.
4	Left button	Functions as the barcode scan button. You can also change the functions of the Left button. For more information, refer to <i>Button Setting on page 112</i> .
5	Volume up button	Turns the volume up.
6	Volume down button	Turns the volume down.
7	Front camera	Takes selfies and records videos (1.3 Megapixel). You can use it when you have a video call.
8	Right button	Functions as the barcode scan button. You can also change the functions of the Right button. For more information, refer to <i>Button Setting on page 112</i> .
9	Multi-purpose jack	Connects your device with other devices, such as a computer, via a micro-USB cable.

3 Overview

No.	Name	Description
10	Search button	Searches for information online via Bing. If you tap and hold this button for a few seconds, the voice recognition service will launch.
11	Start button	Returns to the Start screen. If you tap and hold this button for a few seconds, the FEEDBACK HUB app will launch.
12	Back button	Returns to the previous page or menu. If you tap and hold this button for a few seconds, the apps you previously opened will be listed. Tap any app to open it again.
13	Speaker	Emits sound.
14	Menu button	Displays more option menus. If you tap and hold this button for a few seconds, the apps you previously opened will be listed. Tap any app to open it.
15	Primary microphone	Captures sound for calling, video recording, and speech recognition.
16	Back button	Returns to the previous page or menu.
17	Home button	Returns to the Home screen.

3.2.2 Back

No.	Name	Description
❶	Flash	Illuminates your surroundings when using the camera and related apps.
❷	Rear camera	Takes photos and record videos (13 Megapixel).
❸	Secondary microphone	Acts as sub microphone, removing noise and echoes.
❹	External device connector	Connects external devices such as an RFID reader (optional).
❺	Battery cover	Protects the battery and inner part of the device.
❻	Battery lock	Locks the battery cover so that it does not become detached from the device.

3.2.3 Bottom and Top

No.	Name	Description
1	Barcode scanner	Scans barcodes by emitting a red laser when you press the related button.
2	Headset jack	Connects to the headset.
3	Power button	Turns the device or screen on or off. You can lock the device by turning off the screen.
4	Charging contacts	Allows the device to be charged.

4.1 Cards

There are two slots for a micro SD and a micro SIM card in the inner compartment on the back of your device.

- A micro SD card is required for external storage.
- A micro SIM card is required for using mobile services.

All cards should be purchased separately if necessary. The specifications may differ according to country where the device is purchased. Contact your sales representative for more information.

4.1.1 Installing the Cards

To insert the cards, the battery cover must be removed first. For information on how to remove the battery cover, refer to *Installing the Battery on page 11*. Before installing a card, make sure you are using the correct slot.

To insert the micro SIM card

Insert a micro SIM card into the slot, pressing the lock with a card.

- Make sure that the gold contacts on the cards are facing down.

To insert the micro SD card

Insert a micro SD card into the slot, pressing the lock with a card.

- Make sure that the gold contacts on the cards are facing down.

4.1.2 Removing the Cards

Pull the cards out to remove them, pressing the lock with your finger.

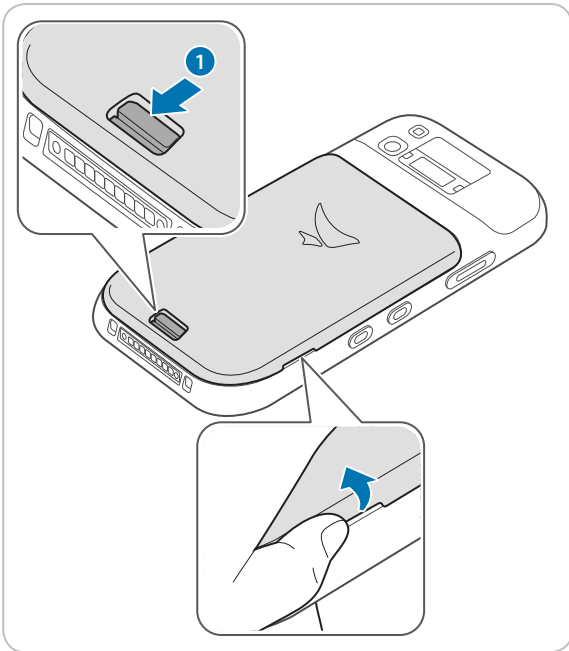

4.2 Battery

EF400 uses a Lithium-ion rechargeable battery. Install the provided battery before charging the device.

4.2.1 Installing the Battery

- 1 Slide the battery lock and lift up the battery cover.

- ! • When removing the battery cover, be careful not to damage your fingernail.
- Do not try to pull the battery cover excessively. It may damage the cover.

- 2 Insert the battery. Make sure the gold contacts are aligned.

4 Getting Started

- 3 Replace the cover. Insert the top of the cover first and then press around the edges of the cover until it clicks into place.

- 4 Close the battery lock to lock the battery cover.

4.2.2 Removing the Battery

- 1 Remove the battery cover as described in *Installing the Battery on page 11*.
- 2 Lift up the bottom of the battery and pull it out of the compartment as shown in the image below.

! Before removing the battery, turn off the power. Failure to do so it may cause damage to the device.

4.2.3 Charging the Battery

The device can be charged with a charger or a cradle. You can also charge the battery by connecting it to your computer with the provided micro USB cable. Check the device's battery status on the status bar. You can also check the battery status on the lock screen.

- When the battery is low, the device will emit a sound and display a low power message.
- When the battery is charging, the charging LED will be red.
- When the battery is fully charged, the charging LED will be green.

 Charge the device before using it for the first time or after not using it for a long time.

To charge with the charger

Plug the micro 5-pin end of the charger into the device's multi-purpose jack. Connect the micro USB cable of the charger with power adapter. Plug the charger into a power outlet.

 When the battery is extremely low on power, the device may not turn on. Charge the device enough and try to turn it on again. You can use the device while charging. But it may take longer to fully charge the device.

-  • Connect the charger properly. Failure to do so may cause damage to the device.
- The device may heat up when charging. If it gets hotter than usual, stop charging.
- Do not remove the battery before disconnecting the charger. Doing so may cause damage to the device.

To charge with the cradle

Connect the power adapter with the cradle, and plug it into a power outlet.

 You can also take out the battery from the device and charge it separately in a cradle.

4.2.4 Extending the Battery Life

You can improve the battery life in various ways. The easiest way is to use battery saver mode. When the device goes into battery saver mode, some background features and app settings may not function normally.

There are some other ways to improve your device's battery life.

- Always fully charge the battery.
- Mute unnecessary sounds, such as keypad sounds.
- Use a wired headset, rather than the loudspeaker.
- Close the Camera app whenever you have finished taking photos.
 - Tap the Back button  on Windows devices.
 - Tap the Back button  on Android devices.
- Decrease the length of the screen time-out.
 - On the Apps screen, tap **Settings** > **lock screen** > **Screen times out after** and set a shorter duration on Windows device.
 - On the Home screen, tap  >  **Display** > **Sleep** and set a shorter duration on Android device.
- Lower the screen brightness.
 - On the Apps screen, tap **Settings** > **brightness**, and select a lower brightness on Windows device.
 - On the Home screen, tap  >  **Display**, and turn **Adaptive brightness** off, then tap the **Brightness level** to adjust the brightness level lower on Android device.
- Set your device to check for new mail less frequently, or even by request only.
 - On the Apps screen, tap **Settings** > **email+accounts**, tap an account, and then change the settings for **Download new email** on Windows device.
 - On the Home screen, tap  >  **Accounts** > **Google** > and, tap an account, and then change the settings for Google on Android device.
- Disable Bluetooth when you are not using it.
- Use a Wi-Fi connection to connect to the Internet, rather than a mobile data connection.
- Prevent your device from scanning for available wireless networks.
 - On the Apps screen, tap **Settings** > **Wi-Fi** and switch **Wi-Fi networking** to **Off** on Windows device.
 - On the Home screen, tap  >  **Wi-Fi** and switch the Wi-Fi to **Off** on Android device.

This chapter explains the basics of how to use your Windows device. If you are an Android device user, refer to *Basics (for Android)* on page 27.

5.1 Turning the Device On and Off

To turn on the device, press and hold the Power button for a few seconds.

To turn off the device, press and hold the Power button for a few seconds, and then drag the “**slide down to power off**” message downward.

5 Basics (for Windows)

- To turn the screen on or off, press the Power button.
- Registering the accounts without turning on the Wi-Fi may incur extra charges depending on your data plan.

Do not turn off the device by removing the battery, as this may damage the device.

5.1.1 Using Airplane Mode

On the Apps screen, tap **Settings** > **airplane mode** and switch **Status** to **On**. This feature disables all wireless and mobile services. Repeat the step to deactivate Airplane mode.

You can set the Wi-Fi and Airplane mode on the quick action center. Drag your finger downward from the top of the screen at any time from any menu or app and tap the **WI-FI** button or **AIRPLANE MODE** button.

5.2 Resetting the Device

If your device does not work properly or freezes due to unknown errors, you can force the device to restart.

To reset the device's hardware

- 1 Press the Volume down button while the device is turning on.
- 2 Press the Volume up > Volume down > Power button in order.

The device will restart automatically with reset setting 6 minutes after the toothed wheel screen appears.

The data on the device is keep saved when you perform the hardware reset.

To reset the device's software

On the Apps screen, tap **Settings** > **about** > **reset your phone**. All settings and data, including apps and personal content, will initialize, and the factory settings will be restored.

- Reset the device whose battery is charged enough not to make the device turn off suddenly during resetting. You can reset the device, charging the battery with micro USB cable when the device has low battery power.
- Back up any data and settings you want to keep before resetting the device to the factory default settings.

5.3 Using the Touchscreen

Use finger gestures to use the touchscreen effectively.

- ⚠ Do not touch the screen with any sharp objects.
- Do not apply too much pressure to the touchscreen.

Gesture	Name	Description
	Tap	Briefly touch an item to open, launch, or select it.
	Zoom in or out	Place two fingers on the screen and spread them apart to zoom in. Pull the fingers together to zoom out. You can also double-tap the screen quickly to zoom in or out.
	Tap and hold	Touch an item or the screen for a few seconds to access more detailed menus or options.
	Swipe	Touch the screen and quickly flick in any direction to scroll through menus or pages.
	Drag	Touch an item or the screen for a few seconds and move your finger around the screen to move the item or move through screens.

5.4 Locking and Unlocking the Device

Lock the screen to protect your device and its data.

The device locks if it is not in use for a specified period by default. To unlock the device, press the Power button to turn on the screen and drag upward from the bottom of the screen.

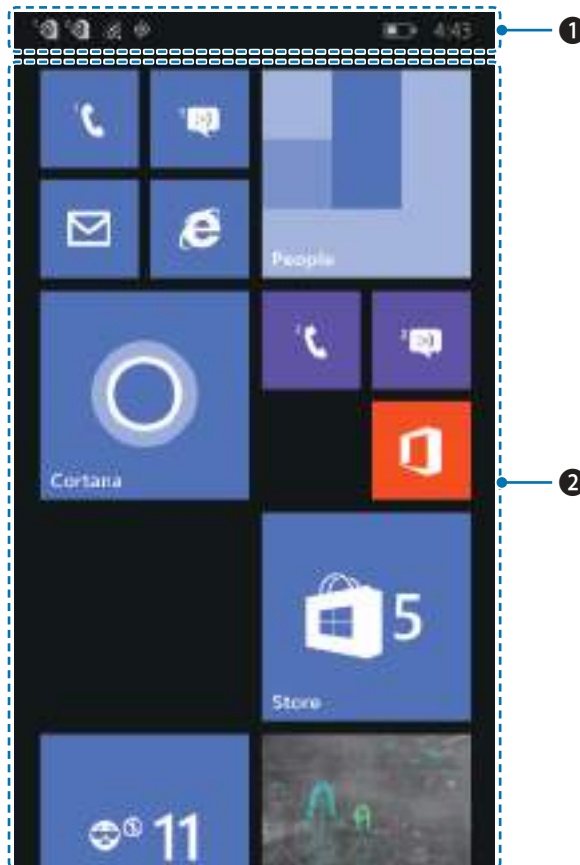

You can increase security by creating a password and screen lock timeout. For more information about how to configure and change screen lock settings, refer to *Lock Screen on page 102*.

5.5 Using the Start Screen

The Start screen is where you open apps and utilities. It is filled with Live Tiles that display real time notifications and updates.

No.	Name	Description
1	Status bar	Displays the status icons, notification icons, and current time.
2	Live tiles	Displays the some apps in your device. You can add, remove, or edit these tiles. For more information, refer to <i>Customizing Your Start Screen on page 22</i> .

The Start screen has long pages. To view other section of the start screen, swipe your finger up or down. You can add or delete contacts, apps, feeds, mailboxes, websites, and other favorites as tiles on the Start screen. You can also rearrange or resize the tiles. For more information about personalizing the Start screen, refer to *Customizing Your Start Screen on page 22*.

- To return to the Start screen, tap the Start button  at any time from any menu or app.
- To view the previously opened apps, tap and hold the Back button  and swipe between the apps. Tap any app to open it again.

5.5.1 Viewing the Status Bar

The status bar appears at the top of the screen. It displays the status icons and the current time on the right, and the notification icons on the left.

No.	Description
1	Notification icons
2	Status icons and the current time

5.5.2 Notification Icons

Notification icons in the status bar alert you to notifications, such as upcoming events, network or Bluetooth connectivity, and much more.

Icon	Description
	Indicates that a Wi-Fi network is available.
	Indicates that a Wi-Fi connection is being used to transfer data.
	Indicates that a cellular data connection is being shared with other devices over Wi-Fi.
	Indicates that your device is connected to a Bluetooth device.
	Indicates that new notifications are available.
	Indicates that call forwarding is active.
	Indicates that Quiet hours is turned on in Cortana's settings.
	Indicates the signal strength.
	Indicates no signal.
	Indicates that Airplane mode is active. You cannot make any calls, and other wireless functions are disabled.
	Indicates that the SIM card is missing.
	Indicates that the SIM card is locked.
	Indicates that your device is connected to a Wi-Fi network.
	Indicates that driving mode is active.

5.5.3 Status Icons

The status icons in the status bar provide information about your device's status, such as the remaining battery, data, and much more.

Icon	Description
	Indicates that your device is connected to an EDGE network.
	Indicates that your device is connected to a GPRS network.
	Indicates that your device is connected to a 3G network.
	Indicates that your device is connected to a 4G network.
	Indicates that your device is connected to an HSDPA/HSUPA network.
	Indicates that your device is connected to an HSPA+/DC-HSDPA network.
	Indicates the battery power level.
	Indicates that the battery is charging.
	Indicates that the battery saver mode is on.
	Indicates that the battery power or state of the battery is not currently known.
	Indicates that vibrate mode is active.
	Indicates that silent mode is active.
	Indicates that your device is roaming and is not using your regular cellular network.
	Indicates that an app is accessing your device's current location information.

- Other than the icons described in the table above, there are various other notifications and status icons that are displayed on the status bar depending on the situation.
- When the icons on the status bar are hidden, tap the status bar on the screen to display icons temporarily.
- The appearance of icons may vary depending on your region or network service provider.

5.6 Customizing Your Start Screen

You can customize the Start screen by rearranging tiles, resizing tiles, and changing the background.

5.6.1 Adding Tiles

The tiles allow you to launch an app or activate a feature quickly. They also allow you to see updates at a glance without opening them. Tap and hold any of the following items, then **pin to start** appears. If you want to add the selected item as a tile on the Start screen, tap **pin to start**.

- Apps or games from the Apps screen
- Contacts or groups
- Favorite photos and music albums
- Favorite websites
- Email folders
- Map locations
- Office files

If you want to add a favorite websites as a tile on the Start screen, tap **...** > **pin to start**.

On the Apps screen, tap **Settings** > **start+theme** and activate **Show more Tiles** to add more tiles. For more information, refer to *Start Screen and Theme on page 101*.

5.6.2 Arranging Tiles

Tap and hold the tile you want to move until it comes to the foreground. Drag the tile to a new location and tap the Start button

5.6.3 Resizing Tiles

Tap and hold the tile you want to change the size until it comes to the foreground. Tap the reduction icon or expansion icon until the tile changes to the size you want and tap the Start button . If the tile you selected is already large, reduction icon appears and if the tile you selected is already small, expansion icon appears.

5.6.4 Removing Tiles

Tap and hold the tile you want to remove from the Start screen and tap the unpin icon . If you unpin a tile from the Start screen, the tile will be removed from the Start screen but will still be available on the Apps screen.

5.7 Using Your Device with Ease

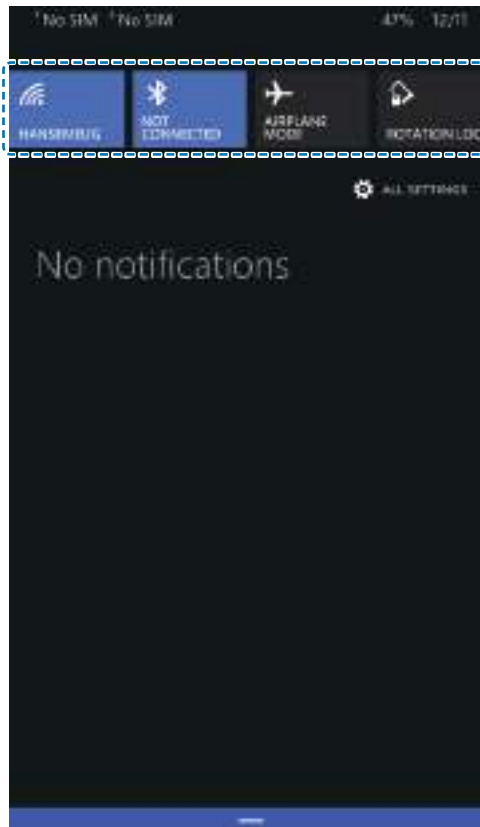

Make it easier to see, hear, and use the device with its built-in accessibility features.

On the Apps screen, tap **Settings** > **ease of access** and make the text size bigger, set a high-contrast theme, zoom in on the screen, and more to fit your individual needs. For more information on configuring ease of access settings, refer to *Ease of Access on page 109*.

5.7.1 Quick Actions

Access the most frequently used settings quickly with quick action, turning them on or off in an instance.

- 1 Drag down from the top of the screen at any time from any menu or app and tap a quick action button to turn it on or off.

- 2 Drag up from the bottom of the screen or tap the Start button  or Back button  to close the action center.

To change quick actions

- 1 On the Apps screen, tap **Settings** > **notifications+actions** and tap any quick action.
- 2 Tap a setting or action from the list to add.
- 3 Tap the Start button  to save the setting.

5.7.2 Setting Date and Time

The date and time are automatically set based on the network you are connected to.

To set the date and time manually

On the Apps screen, tap **Settings** > **date+time** and disable **Set date and time automatically**. If you disable this option, the options for setting date and time will be activated. Tap **Time zone**, **Date**, and **Time** to set the current date and time.

To set the date and time automatically

On the Apps screen, tap **Settings** > **date+time** and enable **Set date and time automatically**.

To change the time format

On the Apps screen, tap **Settings** > **date+time** and enable or disable the **24-hour clock**.

5.7.3 Setting the Keyboard and Language

On the Apps screen, tap **Settings** > **keyboard** or **language** > **add keyboards** or **add languages** and select the languages you want to use on the device.

5.7.4 Adjusting the Screen Brightness

On the Apps screen, tap **Settings** > **brightness** and select **low**, **medium**, or **high**.

5.8 Connectivity

Connect to the Internet and other devices with various connection types.

5.8.1 Wi-Fi

Connecting to a Wi-Fi network is an easy way of accessing the Internet. When you are out, you can connect to Wi-Fi networks in public places, such as libraries or coffee shops.

- 1 On the Start screen, scroll down to the bottom of the Start screen, and tap **All apps**.
- 2 On the Apps screen, tap **Settings > Wi-Fi**.
- 3 Make sure to switch **Wi-Fi networking** to **On**.
- 4 Tap the network you want to join.
- 5 If necessary, enter the password for the network and tap **done**.

To close the connection, tap **Wi-Fi** and switch **Wi-Fi networking** to **Off**.

Your device periodically checks for and notifies you of available connections. The notification appears briefly at the top of the screen.

5.8.2 Bluetooth

You can connect wirelessly to various Bluetooth-compatible devices, such as phones, computers, headsets, and car kits. You can also send your photos to Bluetooth-compatible phones or to your computer. On the Apps screen, tap **Settings > Bluetooth**.

Because devices with Bluetooth wireless technology communicate using radio waves, they do not need to have a direct line of sight.

- Paired devices can be connected to your device when Bluetooth turns on.
- Other devices can detect your device only if the Bluetooth settings view is open.

Do not accept the requests from unknown devices and also do not try to pair with an unknown devices. This helps to protect your device from harmful content.

5 Basics (for Windows)

To pair with a Bluetooth device

Pair your device with Bluetooth compatible devices.

1 On the Apps screen, tap **Settings** > **Bluetooth**.

2 Switch **Status** to **On**.

- Make sure your other devices have Bluetooth enabled.
- You may need to start the pairing process from the headset. For details, see your headset user guide.

3 On the Bluetooth device list, tap the device name to pair with your device.

4 Type or confirm the PIN, and tap **done** or **ok**, if required.

- The passcode, which you can create, must be entered on both devices. The PIN in some devices is fixed. For details, see the user guide of the other device.
- A PIN is only used when you connect to something for the first time.

When your device has paired with other devices via Bluetooth, your devices will automatically pair in the future when in range.

To unpair a Bluetooth device

Unpair your device with other device you paired.

1 On the Apps screen, tap **Settings** > **Bluetooth**.

2 Tap and hold a device's name to disconnect it.

3 Tap **delete**.

To send content via Bluetooth

Use Bluetooth to wirelessly share your photos or other content with Bluetooth-compatible devices or to your computer. You can use more than one Bluetooth connection at a time.

For example, while using a Bluetooth headset, you can still send things to other devices.

1 Pair your device with another Bluetooth device.

2 Tap the content you want to share, then tap  > **Bluetooth**.

3 On the Bluetooth devices list, tap the device you want to share with.

This chapter explains the basics of how to use your Android device. If you are a Windows device user, refer to *Basics (for Windows)* on page 15.

6.1 Turning the Device On and Off

To turn on the device, press and hold the Power button for a few seconds.

To turn off the device, press and hold the Power button, then tap **Power off**.

- To turn the screen on or off, press the Power button.
- Registering the accounts without turning on the Wi-Fi may incur extra charges depending on your data plan.

Do not turn off the device by removing the battery, as this may damage the device.

6.1.1 Using Airplane Mode

On the Home screen, tap  >  **More** and turn **Airplane mode** on. This feature disables all wireless and mobile services. Repeat the step to deactivate Airplane mode.

You can activate Wi-Fi and Airplane mode from the quick action center. Drag down from the top of the screen at any time from any menu or app and tap the **Wi-Fi** button or **Airplane mode** button.

6.2 Resetting the Device

If your device does not work properly or freezes due to unknown errors, you can force the device to restart.

To reset the device's hardware

- 1 Press the Volume down button while the device is turning on.
- 2 Press the Volume up > Volume down > Power button in order.

The device will restart automatically with reset setting 6 minutes after the toothed wheel screen appears.

The data on the device is keep saved when you perform the hardware reset.

To reset the device's software

On the Home screen, tap  >  **Backup & reset** > **Factory data reset**. All settings and data, including apps and personal content, will initialize, and the factory settings will be restored.

- Reset the device whose battery is charged enough not to make the device turn off suddenly during resetting. You can reset the device, charging the battery with micro USB cable when the device has low battery power.
- Back up any data and settings you want to keep before resetting the device to the factory default settings.

6.3 Using the Touchscreen

Use finger gestures to use the touchscreen effectively.

- ⚠ Do not touch the screen with any sharp objects.
- Do not apply too much pressure to the touchscreen.

Gesture	Name	Description
	Tap	Briefly touch an item to open, launch, or select it.
	Zoom in or out	Place two fingers on the screen and spread them apart to zoom in. Pull the fingers together to zoom out. You can also double-tap the screen quickly to zoom in or out.
	Tap and hold	Touch an item or the screen for a few seconds to access more detailed menus or options.
	Swipe	Touch the screen and quickly flick in any direction to scroll through menus or pages.
	Drag	Touch an item or the screen for a few seconds and move your finger around the screen to move the item or move through screens.

6.4 Locking and Unlocking the Device

Lock the screen to protect your device and its data.

The device locks if it is not in use for a specified period by default. To unlock the device, press the Power button to turn on the screen and drag upward from the bottom of the screen.

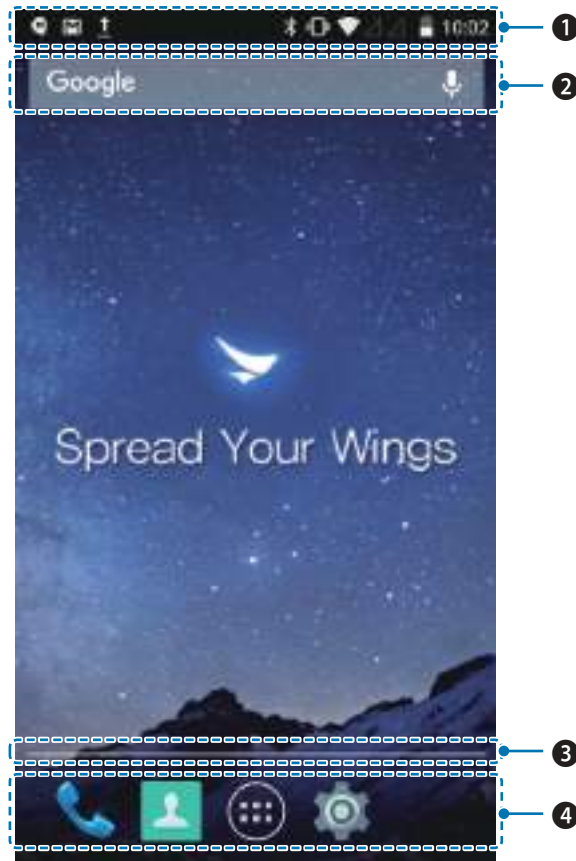

You can increase security by creating a screen pattern, a PIN, or password. For more information about how to configure and change screen lock settings, refer to *Security on page 118*.

6.5 Using the Home Screen

The Home screen is the starting point for all apps and features. It displays icons, shortcuts, and widgets for apps.

No.	Description
1	Status bar
2	Widget
3	Location indicator
4	App icons

The Home screen has multiple pages. To view other pages, swipe left or right. The white bar at the bottom of the Home screen indicates the current page you are viewing.

You can add or delete shortcuts, and widgets on the Home screen. You can also arrange the shortcuts and widgets. For more information about personalizing your Home screen, refer to *Customizing Your Home Screen* on page 34.

- ✔ To return to the Home screen, tap Home button  at any time from any menu or app.
- To view the previously opened apps, tap Menu button  and swipe between the apps. Tap any app to open it again.

6.5.1 Viewing the Status Bar

The status bar appears at the top of the screen. It displays the status icons and the current time on the right, and the notification icons on the left.

No.	Description
1	Notification icons
2	Status icons and the current time

6.5.2 Notification Icons

Notification icons in the status bar alert you to notifications, such as upcoming events, messaging, emails, missed calls, data usage, and much more.

Icon	Description
	Indicates that there are more notifications that are not displayed in the status bar.
	Indicates that data is syncing.
	Alerts you to an upcoming event.
	Indicates that a song is playing.
	Indicates that your device is uploading data.
	Indicates that your device is downloading data.
	Indicates that the micro SD card is almost full.
	Your device has detected an active USB connection.
	Indicates that your device has received a new text or multimedia message.
	Indicates that you have missed calls.

6.5.3 Status Icons

The status icons in the status bar provides information about your device's status, such as GPS, signal strength, roaming, battery charge, data, alarm, etc.

Icon	Description
	Indicates that GPS is in on.
	Indicates that your device is searching for location data.

6 Basics (for Android)

Icon	Description
	Indicates that the alarm is set.
	Indicates that the device is set to vibrate.
	Indicates that all sounds are turned off.
	Indicates that the microphone is muted during a call.
	Indicates that the battery is fully charged.
	Indicates that the battery is partially drained.
	Indicates that the battery is low.
	Indicates that the battery is very low.
	Indicates that the battery is charging.
	Indicates that Airplane mode is active—you cannot make any calls, and other wireless functions are disabled.
	Indicates that Bluetooth is on.
	Indicates that your device is connected to a Wi-Fi network.
	Indicates that there is no Wi-Fi signal.
	Indicates that you are in range of your mobile network and it indicates the mobile network's signal strength.
	Indicates that there is no mobile network signal.
	Indicates that your device is connected to a 4G network.
	Indicates that your device is connected to a 3G network.
	Indicates that your device is connected to an HSPA network.
	Indicates that your device is connected to an EDGE network.
	Indicates that your device is connected to an GPRS network.
	Indicates that there is no SIM card installed.

- Other than the icons described in the table above, there are various other notifications and status icons that are displayed on the status bar depending on the situation.
- When the icons on the status bar are hidden, tap the status bar on the screen to display icons temporarily.
- The appearance of icons may vary depending on your region or network service provider.

6.6 Customizing Your Home Screen

You can customize the Home screen by adding shortcuts and widgets.

6.6.1 Adding Shortcuts or Widgets

Shortcuts added on the Home screen allows you to access and launch apps or activate a feature quickly and easily. Widgets appear as on-screen apps.

On the Home screen, tap  to view your all apps under the **APPS** tab or all widgets under the **WIDGETS** tab. Locate an app or widget, and tap and hold the item until the Home screen appears. Position the item on the screen and release.

The same shortcuts or widgets can be added to any of the available screens.

6.6.2 Arranging Shortcuts or Widgets

Tap and hold the shortcut icon or widget you want to move. Drag the shortcut icon or widget to a new location. To place the item on a different page, drag it to the edge of the screen.

To change the size of your widget, tap and hold the widget on the Home screen. Release the item and a white box will be displayed around the widget. Drag the white dots to change the size. It is not available for some widgets.

6.6.3 Removing Shortcuts or Widgets

Tap and hold an shortcut icon or widget. Drag it to **X Remove** at the top of the screen. When the item turns red, release it.

6.7 Using Your Device with Ease

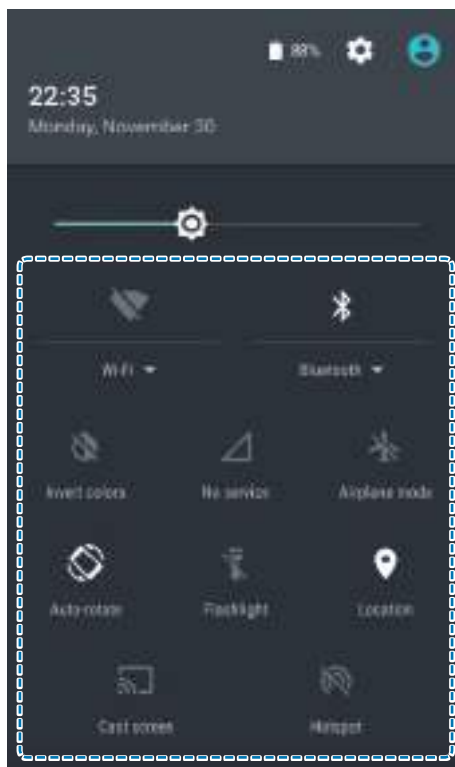

Make it easier to see, hear, and use the device with its built-in accessibility features.

On the Home screen, tap  >  **Accessibility** and make the text size bigger, increase text contrast, and more to fit your individual needs. For more information on configuring Accessibility settings, refer to *Accessibility on page 121*.

6.7.1 Quick Actions

Access the most frequently used settings quickly with quick action, turning them on or off in an instance.

- 1 Drag down from the top of the screen at any time from any app and tap a quick action button to turn it on or off.

- 2 Drag up from the bottom of the screen or tap the Back button  twice.

6.7.2 Setting Date and Time

The date and time are automatically set based on the network you are connected to.

To set the date and time manually

On the Home screen, tap  >  **Date & time**, then disable **Automatic date & time**. If you turn off this option, the options for setting date and time will be activated.

To set the date and time automatically

On the Home screen, tap  >  **Date & time**, then enable **Automatic date & time**.

To set the date and time format

On the Home screen, tap  >  **Date & time**, then turn **Use 24-hour format** on or off.

6.7.3 Setting the Keyboard and Language

On the Home screen, tap  >  **Language & input** to change the language and the keyboard you use. For more information, refer to *Language and Input on page 120*.

6.7.4 Adjusting the Screen Brightness

- 1 On the Home screen, tap  >  **Display** > **Brightness level**.
- 2 Tap and move the slider to adjust the screen brightness.

6.8 Connectivity

6.8.1 Wi-Fi

Connecting to a Wi-Fi network is an easy way of accessing the Internet. When you are out, you can connect to Wi-Fi networks in public places, such as libraries or coffee shops.

- 1 On the Home screen, tap  >  **Wi-Fi**.
- 2 Make sure switch the Wi-Fi to **On**.
- 3 Tap the network you want to join.
- 4 If necessary, enter the password for the network and tap **CONNECT**.

To close the connection, switch the Wi-Fi to **Off**.

Your device periodically checks for and notifies you of available connections. The notification appears briefly at the top of the screen.

6.8.2 Bluetooth

You can connect wirelessly to various Bluetooth-compatible devices, such as phones, computers, headsets, and car kits. You can also send your photos to Bluetooth-compatible phones or to your computer.

On the Home screen, tap  >  **Bluetooth**.

Because devices with Bluetooth wireless technology communicate using radio waves, they do not need to have a direct line of sight.

- Paired devices can be connected to your device when Bluetooth turns on.
- Other devices can detect your device only if the Bluetooth settings view is open.

Do not accept the requests from unknown devices and also do not try to pair with an unknown devices. This helps to protect your device from harmful content.

To pair with a Bluetooth device

Pair your device with Bluetooth compatible devices.

1 On the Home screen, tap  >  **Bluetooth**.

2 Turn the Bluetooth **On**.

- Make sure the devices you want to pair with have Bluetooth enabled.
- You may need to start the pairing process from the headset. For details, see your headset user guide.

3 On the Bluetooth device list, tap the device you want to pair with.

4 Type or confirm the PIN, and tap **PAIR**, if required.

- The passcode, which you can create, must be entered on both devices. The PIN in some devices is fixed. For details, see the user guide of the other device.
- A PIN is only used when you connect to something for the first time.

When your device has paired with other devices via Bluetooth, your devices will automatically pair in the future when in range.

To unpair a Bluetooth device

Unpair your device with other device you paired.

1 On the Home screen, tap  >  **Bluetooth**.

2 Tap device's name to disconnect it.

3 Tap **FORGET**.

To send content via Bluetooth

Use Bluetooth to wirelessly share your photos or other content with Bluetooth-compatible devices or to your computer. You can use more than one Bluetooth connection at a time.

For example, while using a Bluetooth headset, you can still send things to another device.

1 Pair your device with another Bluetooth device.

2 Tap the content you want to share then tap  > **Bluetooth**.

3 On the Bluetooth devices list, tap the device you want to share with.

7 Applications (for Windows)

7.1 Installing and Uninstalling Apps

You can purchase and download apps.

On the Apps screen, tap **Store**.

7.1.1 Installing App

In the Store, browse apps by category or tap  to search for a keyword.

Select an app you want to install and see whether the app is free or not.

- To download a free app, tap **install**.
- To purchase and download a paid app, tap **buy** and follow the on-screen instructions.

To change the auto update setting, tap **⋮** > **settings** and disable **Update apps automatically**.

7.1.2 Uninstalling App

On the Apps screen, tap and hold the app that you want to uninstall and tap **uninstall**.

7.2 Overview of Apps

On the Start screen, tap **All apps** to view your all apps. All the apps on your device will be displayed.

Icon	Name	Description
	Alarms	Use to set alarms.
	Battery Saver	Use to check the battery usage and estimated remaining battery. Activate the battery saver mode to conserve the battery life.
	BB_Devchecker	Use to view device version information, check your device, or to reset.
	BB_EF_ScannerApp	Use to scan and read the barcode information. For more information, refer to <i>Barcode on page 55</i> .
	Calculator	Use for mathematical calculations. For more information, refer to <i>Calculator on page 70</i> .
	Calendar	Use to create, view, and manage events. For more information, refer to <i>Calendar on page 69</i> .
	Camera	Use to take photos or record videos. For more information, refer to <i>Camera on page 56</i> .
	Cortana	Use to get help for finding things on device, manage calendar, files as a voice recognition service.
	Data Sense	Use to conserve cellular data and track usage on your device.
	Feedback Hub	Use to send feedback to the manufacturer to improve their products and service.
	Field Medic	Use to check and collect the device information and ETW logs from your device.
	Games	Use to play games saved in device.
	Internet Explorer	Use to browse the Internet. For more information, refer to <i>Internet on page 60</i> .
	Maps	Use to find the locations. For more information, refer to <i>Map on page 71</i> .
	Messaging	Use to send or receive SMS or MMS message. For more information, refer to <i>Messaging on page 52</i> .
	Music	Use to listen music saved in device. For more information, refer to <i>Music on page 67</i> .

7 Applications (for Windows)

Icon	Name	Description
	Office	Use to work on MicroSoft office documents. Create and edit Word, Excel documents, view PowerPoint slides, and more. For more information, refer to <i>Microsoft Office Mobile on page 61</i> .
	OneDrive	Use to save and upload content saved in device. For more information, refer to <i>Microsoft OneDrive on page 66</i> .
	OneNote	Use to create reminders. For more information, refer to <i>Microsoft OneNote on page 65</i> .
	People	Use to add, view, and edit the contacts or share information with people involved in same groups or rooms. For more information, refer to <i>People on page 49</i> .
	Phone	Use to make phone calls. For more information, refer to <i>Phone on page 42</i> .
	Photos	Use to view and manage all photos and videos. For more information, refer to <i>Photos on page 58</i> .
	Podcasts	Use to get the latest audio or video podcasts. For more information, refer to <i>Podcast on page 69</i> .
	Settings	Use to configure your device. For more information, refer to <i>Settings (for Windows) on page 98</i> .
	Storage Sense	Use to check the storage space and set the storage location.
	Store	Use to download apps. For more information, refer to <i>Installing and Uninstalling Apps on page 39</i> .
	Video	Use to view all videos saved in the devices. For more information, refer to <i>Videos on page 68</i> .
	Wallet	Use to pay for goods with the card payment system on your device.

7.3 Phone

7.3.1 Making Calls

To make a call on the dialer screen

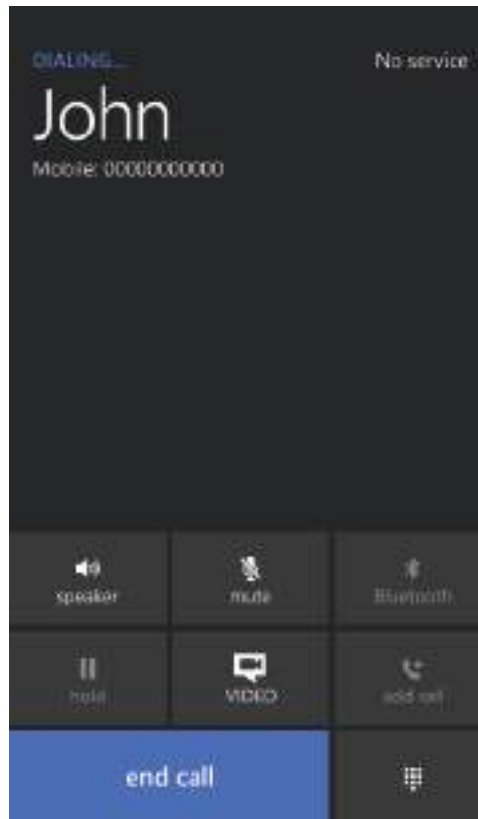

- 1 On the Start screen, tap .
- 2 Tap  on your Phone app.

- 3 Tap the keypad, enter a phone number, then tap **call** to call.
 - Enter digits and tap **save** to save a new phone number in your Outlook contacts.
-  Touch and hold number 1 key to use voice mail.

To use options during your call

Icon	Description
speaker	Turn the speakerphone on.
mute	Mute your microphone.
Bluetooth	Transfer the current call to the connected Bluetooth headset.
hold	Hold the current call.
VIDEO	Change to a video call.
add call	Add another person to the call.
end call	End the call.
	Open the Keypad.

7 Applications (for Windows)

To make a call from contacts list

- 1 On the Start screen, tap .
- 2 Tap  on your Phone app.

- 3 Tap a name in your contacts in the **CALL A CONTACT** tab to dial the number. If you want to search for a contact, tap .

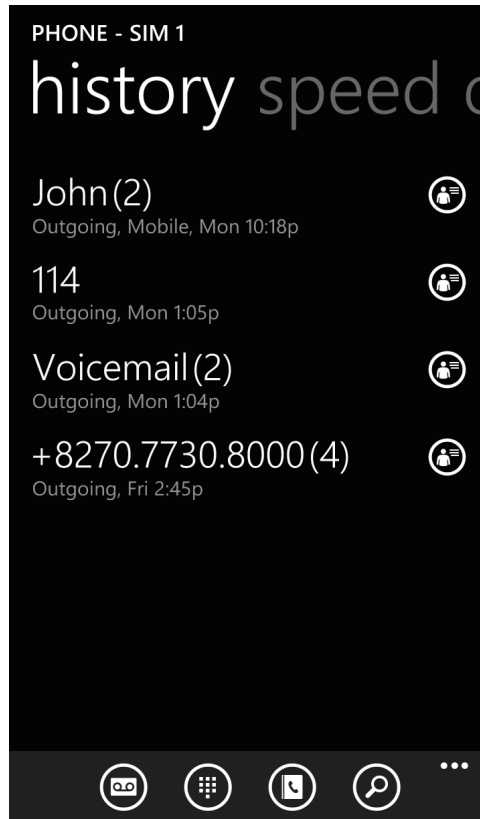

Only the contacts with phone numbers will be displayed on this screen. To view all contacts, tap the **People** tile on your Start screen or tap **People** on the Apps screen.

7 Applications (for Windows)

To make a call from history

- 1 On the Start screen, tap .
- 2 On your Phone app, swipe the screen to the left or right until the **history** tab appears.

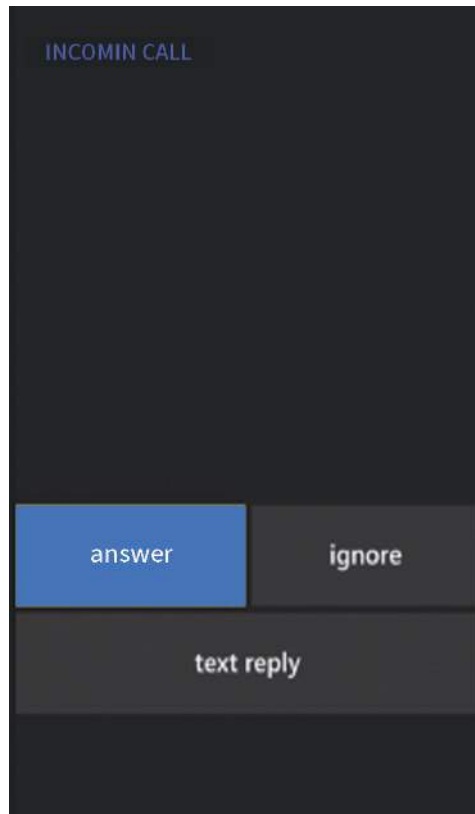

- 3 Tap a name or a number in your history list to dial the number.

7.3.2 Answering Calls

When you receive a phone call, the incoming call screen displays the caller ID, and any other available information, such as the caller's name, if saved in the Contacts list.

Tap one of the following buttons:

Icon	Description
answer	Answer an incoming call.
ignore	Decline an incoming call and divert it to voicemail.
text reply	Decline an incoming call and send a text message.

To silence the ringtone of an incoming call, press the volume down button on the side of the device.

7.3.3 Viewing Call History

To view the call log by incoming, outgoing, and missed calls or to clear the call history, tap  on the Start screen. The call history displays the dialed, missed, and received calls.

7.3.4 Making Emergency Calls

You can make emergency calls to 911 even when your phone is locked, not registered for mobile network service, or a SIM is not inserted. No charges for making emergency calls.

 The emergency numbers may vary by country.

7.3.5 Making Speed Dial

You can make calls quickly without entering a phone numbers or searching for a contacts by saving your favorite numbers as a speed dial number.

To create a new speed dial

- 1 On the Start screen, tap .
- 2 Swipe the screen on Phone app left or right until the **speed dial** tab appears.
- 3 Tap  and select a name you want to add as a speed dial number.

To edit speed dial

- 1 On the Start screen, tap .
- 2 Swipe the screen on phone app left or right until the **speed dial** tab appears.
- 3 Tap **...** > **edit**.
- 4 Select the name you want to edit.

Icon	Description
	Move the selected speed dial up on the list.
	Move the selected speed dial down on the list.
	Delete the selected speed dial.
	Add another number as speed dial.

7.3.6 Call Settings

- 1 On the Start screen, tap .
- 2 Tap **...** > **settings** on any tab of the Phone app. This **SETTINGS** can only be accessed through this app. You can modify various call options.
 - **Text reply:** Switch the text reply to **On** to send a text message when you cannot answer a call. To edit the text message, tap **edit replies** and enter a message to send. You can create up to 4 messages.
 - **International assist:** Activate this feature to correct some mistakes while dialing internationally or dialing while abroad.
 - **Switch to video calls with:** You can turn a phone call into a video call using a video call app, such as Skype. If you have no related app, tap **get an app** to download the video call app.
 - **SIM settings:** Configure the settings for the SIM card.
 - **My phone number:** Check your phone number.
 - **Voicemail number:** Enter the voicemail number.

- 3 Open **Windows Explorer**.

If you are using Windows 8 and higher version, open **File Explorer**.

- 4 Click the name of device > **Phone** > **Music** under **Computer**.
- 5 Drag the file you want to add on the device from the computer and drop it in **Music** folder. You can use copy and paste feature to add the music.

You can use other ways to add the music on the device. For more information tap **How to add music** on **GET MUSIC** tab.

7.13 Videos

This app lists all videos saved on your device.

You must have a Microsoft account to download videos from your Xbox.

7.13.1 Playing Video

On the Start screen, tap . Tap a video to play it. You can listen to the audio through the built-in speaker, headphones or earphones, or wireless Bluetooth stereo headphones.

7.13.2 Downloading TV Programs and Movies

- 1 On the Start screen, tap .
- 2 Tap any videos you want to watch on **SPOTLIGHT**, **TV STORE** or **MOVIES STORE** tab and follow the on-screen instructions.

7.14 Podcast

Use this app to enjoy the latest audio and video podcasts on your device.

7.14.1 Downloading and Playing Podcasts

- 1 On the Start screen, tap .
- 2 Enter the podcast name or the URL you want to find on the field in **GET PODCASTS** tab.
- 3 Tap  and select one from the podcast lists.
- 4 Tap  to play or tap  to download.

If you download a podcast, it will be stored in your phone.

7.15 Calendar

Use this app to create, view, and manage events.

7.15.1 Changing the Calendar View

Browse your events in various calendar views.

- 1 On the Apps screen, tap **Calendar**.
- 2 Swipe left or right to switch between the calendar views.
Tap  to view the calendar in day, week, month or year format.

7.15.2 Adding a Task

Add tasks to the calendar. You can set a reminder for a task.

To add tasks, you must set up a Microsoft or Outlook account. For information about how to set up an account, refer to *Creating Your Microsoft Account on page 62*.

- 1 On the Apps screen, tap **Calendar**.
- 2 Tap **...** > **tasks** > .
- 3 Tap **Account** and select the calendar you want to add your task to.
- 4 Enter the task details.
- 5 Activate **Reminder** and set the date and time.
- 6 Tap  to save the task in your calendar.
 - To mark a task as complete, tap and hold the task, and then tap **complete**.
 - To edit or delete a task, tap and hold the task, and then tap **edit** or **delete**.

7 Applications (for Windows)

7.15.3 Adding an Appointment

Add appointments to the calendar. You can set a reminder for an appointment.

- 1 On the Apps screen, tap **Calendar**.
- 2 Tap **...** > **+**.
- 3 Enter the appointment details.
- 4 Tap **more details** > **Reminder** and set the date and time.
- 5 Tap **☑** to save the appointment in your calendar.

To edit or delete an appointment, tap and hold the task, and then tap **edit** or **delete**.

7.15.4 Using Multiple Calendars

If you have set up multiple email accounts on your device, you can view the calendars from all your accounts in one place.

- 1 On the Apps screen, tap **Calendar**.
- 2 Tap **...** > **settings** and tap each account or calendar to set on or off.

To change the color of each calendar, tap **...** > **settings**, and then tap the current color and the new color.

7.16 Calculator

Use this app for mathematical calculations.

On the Apps screen, tap **Calculator**, and then tap numbers and functions as you would do with a standard calculator.

- To clear all digits on the display panel, tap **C**.
- To clear digits or signs one by one, tap **⌫**.
- To clear the memory, tap **MC**.
- To retrieve a number from the memory, tap **MR**.
- To save a number to the memory, tap **M+**.
- To use the scientific calculator, turn your device to landscape orientation.
- To go back to the basic panel, turn your device to portrait orientation.

7.17 Map

Use this app to find your location on a map, search for locations, and get directions to your destination.

7.17.1 Get Directions to Your Destination

- 1 On the Apps screen, tap **Maps**.
- 2 Tap  and enter the start and end point in each field.
- 3 Tap  to get directions and calculate the time required to get to the destination.

If you have a navigation app, tap **start voice nav** to connect directly to a related app and get help for a guide.

7.17.2 Searching for Location

- 1 On the Apps screen, tap **Maps**.
- 2 Tap  and enter the location name or address.
- 3 Tap  to search for the location on the map.

8.1 Installing and Uninstalling Apps

You can purchase and download apps.

On the Apps screen, tap  or  located in the top right of the screen.

8.1.1 Installing App

In the Play Store, browse apps by category or enter the keywords on search field to search for a keyword.

Select an app you want to install and see whether the app is free or not.

- To download a free app, tap **INSTALL**.
- To purchase and download a paid app, tap the price and follow the on-screen instructions.

To change the auto update settings, tap  > **Settings** and switch the **Auto-update apps**, and then select an option.

8.1.2 Uninstalling App

On the Apps screen, tap and hold the Menu button  > **Manage apps**. Tap the app that you want to remove and tap **UNINSTALL**.

8.2 Overview of Apps

On the Home screen, tap  to view your all apps. All the apps on your device will be displayed under the **APPS** tab. The **WIDGETS** tab shows all widgets that can be placed on the Home screen.

Icon	Name	Description
	BarcodeTest	Use to scan and read the barcode information. For more information, refer to <i>Barcode on page 86</i> .
	BBSettings	Use to change your Bluebird settings in Symbology and Fix/Volume/Mode.
	BBUpdate	Use to update your device.
	Bluebird File Manager	Use to organize and manage your files.
	Calculator	Use for mathematical calculations. For more information, refer to <i>Calculator on page 96</i> .
	Calendar	Use to create, view, and manage events. For more information, refer to <i>Calendar on page 90</i> .
	Snapdragon Camera	Use to take photos or record videos. For more information, refer to <i>Snapdragon Camera on page 86</i> .
	Clock	Use to set an alarm, view current times around the world, and use a timer or a stopwatch. For more information, refer to <i>Clock on page 92</i> .
	Contacts	Use to add, view, and edit your contacts. For more information, refer to <i>Contacts on page 83</i> .
	DevCheck	Use to view device version information, check your device, or to reset your device.
	Downloads	Use to view all downloaded files. For more information, refer to <i>Downloads on page 96</i> .
	Email	Use to send or view emails. For more information, refer to <i>Email on page 85</i> .
	Phone	Use to make phone calls. For more information, refer to <i>Phone on page 74</i> .
	Settings	Use to configure your device. For more information, refer to <i>Settings (for Android) on page 113</i> .
	SIM Toolkit	Use various apps provided by the inserted SIM card.
	Voice Dialer	Use to say various commands. For more information, refer to <i>Voice Dialer on page 83</i> .

8.3 Phone

8.3.1 Making Calls

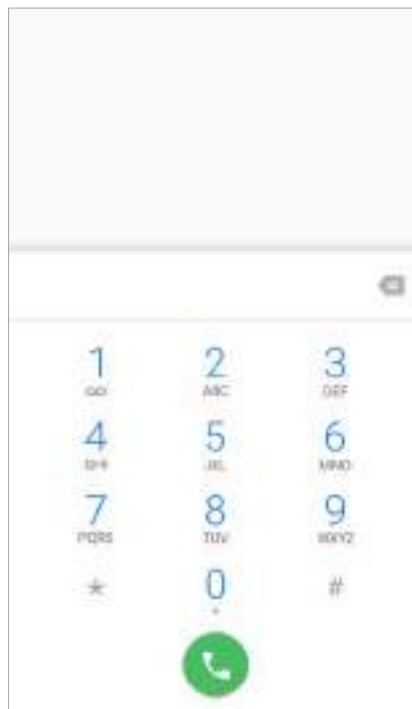

On the Home screen, tap  > . You can also directly open the Phone app from the lock screen.

Swipe the screen to left while tapping .

You can simply dial the number, tap on a number on the call log, or choose a number in your contacts, or use Voice Dialer. For more information, refer to *Voice Dialer on page 83*.

To make a call on the dialer screen

- 1 On the Home screen, tap  > .
- 2 Tap  on your Phone app.

- 3 Tap the keypad, enter a phone number, then tap  to call.

 Touch and hold number 1 key to use voicemail.

Enter digits and tap  on this screen for dialing options.

- **Add to contacts:** Select to add a number to the contacts list as a new contact or as an existing contact.
- **Add 2-sec pause:** Select to add a two-second pause before the phone dials the following sequence of digits. Multiple pauses can be added.
- **Add wait:** Select to make the phone dial the sequence of digits when you tap **Yes** on the pop-up screen.
- **Send text message:** Select to send a text message to the dialed number.

To use options during your call

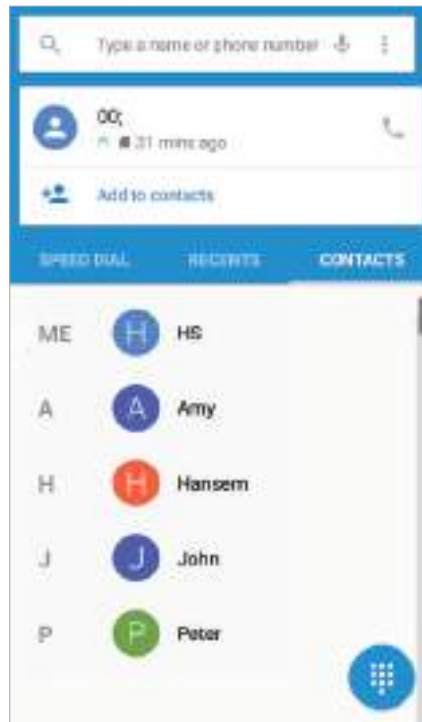

Icon	Description
	Turn the speakerphone on.
	Mute your microphone.
	Open the keypad.
	Hold a call.
	Add another person to the call.
	End the call.

8 Applications (for Android)

To make a call from contacts list

- 1 On the Home screen, tap  > .
- 2 Tap the **CONTACTS** tab on your Phone app.

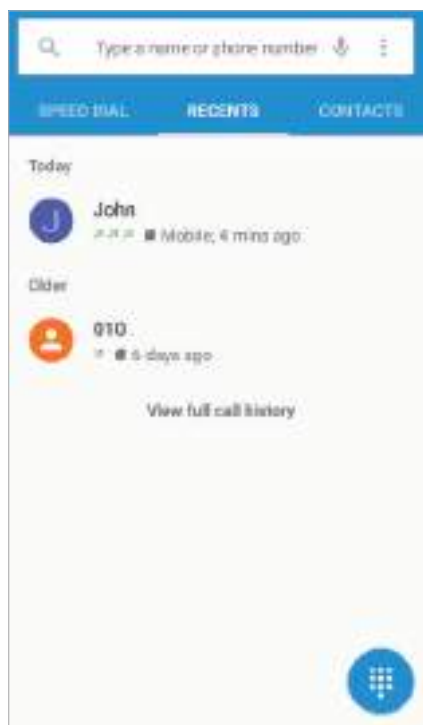

- 3 Tap a name in your contacts list and then tap a phone number to dial the number.

8 Applications (for Android)

To make a call from call log

- 1 On the Home screen, tap  > .
- 2 Tap the **RECENTS** tab on your Phone app. You can also open the call log by tapping  > **Call History**.

- 3 Tap a name > **CALL BACK** to dial the number.

8 Applications (for Android)

To make a call from speed dial

You can make quick calls without entering a phone number or searching for a contact with the speed dial function. You should assign a speed dial number to a contact first. For more information on creating new speed dial, refer to *Making Speed dial on page 81*.

- 1 On the Home screen, tap  > .
- 2 Tap the **SPEED DIAL** tab on your Phone app.

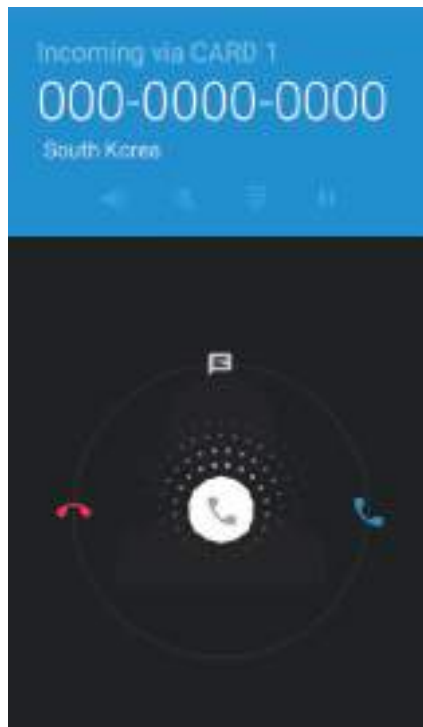

- 3 Tap any speed dial contact to dial the number.

8.3.2 Answering Calls

When you receive a phone call, the incoming call screen opens with the caller ID, and any other available information, such as the caller's name, if saved in the contacts list.

Tap and drag  to one of the following icons:

Icon	Description
	Answer an incoming call.
	Decline an incoming call and divert it to voicemail.
	Decline an incoming call and send a text message.

- To silence the ringtone or to stop the vibration of an incoming call, press the Volume down button on the side of the device.
- To edit the quick text responses for declining a call, tap  >  >  > **Settings > General settings > Quick responses.**

8.3.3 Viewing Call Log

The call log displays the dialed, missed, and received calls.

- 1 On the Home screen, tap  > .
- 2 Tap the **RECENTS** tab on your Phone app. You can also open the call log menu by tapping  > **Call History**.

Icon	Description
	Missed incoming calls
	Received incoming calls
	Outgoing calls

8.3.4 Making Conference Calls

You can make a conference call with many people. The maximum number of people who can be in a conference call at once depends on your service provider.

- 1 On the Home screen, tap  >  > .
- 2 Make a call first and tap  to add another person to the call.
The first call will be put on hold.
- 3 Dial the second number and make the call.
- 4 When the second call is connected, tap  to create a conference call with three people.
- 5 To add another person to the conference call, tap .
- The conference call will be put on hold.
- 6 Dial the third number and make the call.
- 7 When the call is connected, tap to  add the line to the conference call.

You can do following options during the conference call.

- To view all callers participated in the conference call, tap **Manage conference call**.
- To disconnect one caller from the conference call, tap **Manage conference call** > .
- To separate one caller from the conference all, tap **Manage conference call** > .

8 Applications (for Android)

8.3.5 Making Emergency Calls

You can make emergency calls to 911 even when your phone is locked, not registered for mobile network service, or a SIM is not inserted. No charges for making emergency calls.

The emergency numbers may vary by country.

8.3.6 Making Speed dial

To create a new speed dial

- 1 On the Home screen, tap  > .
- 2 Tap the **CONTACTS** tab on your Phone app.
- 3 Tap a name in your contacts.
- 4 Tap  to add the number you selected as a speed dial.

To edit speed dial

- 1 On the Home screen, tap  > .
- 2 Tap the **SPEED DIAL** tab on your Phone app.
- 3 Select the name you want to edit and tap  > .

8.3.7 Phone Settings - General Settings

On the Home screen, tap  >  >  > **Settings** > **General settings** on any tab on your Phone app. This General settings menu can only be accessed through this app. You can modify various call options.

Contact display options

- **Sort by:** Tap to select the sorting method of contacts. You can select **First name** or **Last name**.
- **Name format:** Tap to select the format the names are displayed in. You can select **First name first** or **Last name first**.

Sounds and vibrate

- **Phone ringtone:** Tap to select the ringtone to alert you of incoming calls. Tap a ringtone to play it. If you decide to set it as a ringtone, tap **OK**. If not, select another ringtone or tap **CANCEL**.
- **Dialpad tones:** Tap and select the checkbox to play a sound when tapping the keypad.
- **Also vibrate for calls:** Tap and select the checkbox to set your device to vibrate and emit ringtone at the same time for incoming calls.

Other

- **Quick responses:** Tap and edit the quick responses to use when declining a call.

8.3.8 Phone Settings - Call Settings

On the Home screen, tap  >  >  > **Settings** > **Call settings** on any tab on your Phone app. This Call settings menu can only be accessed through this app. You can modify various call options.

SUBS Settings

- **Voicemail:** Tap to set up your voicemail.
 - **Service:** Tap to set the provider of the voicemail service.
 - **Setup:** Tap to set the voicemail number.
 - **Sound:** Tap to select the ringtone to alert you of a new voicemail message.
 - **Vibrate:** Tap and select the checkbox to set your device to vibrate for a new voicemail message.
- **Fixed Dialing Numbers:** Use a Fixed Dialing Number (FDN) to limit your phone to dial only the phone numbers or area codes saved in the FDN list.
 - **Enable FDN:** Tap and select the checkbox to enable FDN.
 - **Change PIN2:** Tap to change the PIN for FDN access.
 - **FDN list:** Tap to manage the FDN list.
- **GSM call settings:** Tap to set the additional Global System for Mobile communications (GSM) only call settings.
 - **Call forwarding:** Tap and set to forward incoming calls to a different phone number.
 - **Additional settings:** Tap to select to activate the caller ID and call waiting feature.
- **CDMA call settings:** Tap to set the additional Code Division Multiple Access for mobile communication.
 - **Voice privacy:** Tap and select the checkbox to enable enhanced privacy mode.

Other call settings

- **Phone account settings**
 - **Make calls with:** Tap to set the used cards for calling.
 - **SIP accounts:** Tap to choose to receive Internet calls for an account added to the device, to view or change SIP accounts, or to add accounts.
 - **Use SIP calling:** Tap to select the situations when you will use SIP calling.
 - **Receive incoming calls:** Tap and select the checkbox to receive incoming SIP calls. If you enable this option, the device will consume more battery power.
- **TTY mode:** Tap and select the TTY mode.
 - **TTY Off:** TTY mode is off.
 - **TTY Full:** Turn TTY on.
 - **TTY HCO:** Enable HCO (Hearing Carry over). HCO feature is designed for the people who can hear, but have difficulty speaking on the phone. You type the outgoing text but listen to the incoming text.

8 Applications (for Android)

- **TTY VCO:** Enable VCO (Voice Carry over). VCO feature is designed for the people who can speak, but have difficulty hearing on the phone. You can use your voice to speak and read the other person's response in a text typed by the operator.
 - ✔ • Use a TSB-121 cable to connect the TTY device to your phone. If this cable is not provided with your TTY device, contact your TTY device manufacturer.
 - Use the ear pieces and headsets with caution when increasing the volume while using the HCO feature.
 - Teletypewriter or text telephone (TTY) mode is a telecommunications service that allows people with hearing problems, or speech or language disabilities, to send and receive text information over a telephone connection.
- **DTMF tones:** Tap to set the length of dual tone multi frequency (DTMF) tones. You can choose it to be normal (default) or long tones.
- **X-Divert:** Tap to specify the CFNRC (Call Forwarding When Not Reachable) settings. Enter the Sub1 and Sub2 numbers and enable or disable the X-Divert setting.

8.4 Voice Dialer

The Voice dialer app allows you to say a command to make a call, launch a program, or check calendars.

On the Home screen, tap  > . You can say commands similar to the following examples:

- “Call John Doe” to call a person by name
- “Dial 123-4567” to call with a phone number
- “Redial” to call the previous person again
- “Open Clock” to open an app.

8.5 Contacts

Use the Contacts app to add, view, and edit your contacts. The app has two tabs to view your contacts: **FAVORITES, ALL CONTACTS**.

On the Home screen, tap  > , or you can add widgets for your most frequently used contacts to the Home screen.

8.5.1 Creating Contacts

You can add contacts and synchronize them with your accounts that support syncing contacts.

- 1 On the Home screen, tap  > .
All your contacts are listed in the **ALL CONTACTS** tab.
- 2 Tap  at the bottom right of the screen.
- 3 Add information and photo to the contact.
- 4 When you are finished, tap  on the top left of the screen.

8.5.2 Editing Contacts

To edit contact details

- 1 On the Home screen, tap  > .
All your contacts are listed in the **ALL CONTACTS** tab.
- 2 Tap the name of a contact to view their details. Tap .
- 3 When you are finished, tap  on the top left of the screen.

To set a contact's default phone number

When there are two or more phone numbers saved for a contact, you can set a default phone number.

- 1 On the Home screen, tap  > .
All your contacts are listed in the **ALL CONTACTS** tab.
- 2 Tap a name in your contacts to view their details.
- 3 Tap and hold the phone number you want to set as the contact's default number.
- 4 Tap **Set default** from the pop-up menu.
The default number appears on top.

To set a ringtone for a contact

- 1 On the Home screen, tap  > .
All your contacts are listed in the **ALL CONTACTS** tab.
- 2 Tap the name of a contact to view the details.
- 3 Tap  >  > **Set ringtone**.

To place a contact on the Home screen

- 1 On the Home screen, tap  > .
All your contacts are listed in the **ALL CONTACTS** tab.
- 2 Tap the name of a contact to view their details.
- 3 Tap  > **Place on Home screen**.
A widget for the contact will be created on the Home screen.

To delete a contact

- 1 On the Home screen, tap  > .
All your contacts are listed in the **ALL CONTACTS** tab.
- 2 Tap the name of a contact to view their details.
- 3 Tap  >  > **Delete**.

8 Applications (for Android)

8.5.3 Finding Contacts

You can search for contacts by name or number.

- 1 On the Home screen, tap  > .
All your contacts are listed in the **ALL CONTACTS** tab.
- 2 Enter letters of their name or digits of their phone number.
As you type, contacts that includes the letters or numbers will appear below the search box.
- 3 Tap the contact you are searching for to view it.

8.5.4 Calling Contacts

- 1 On the Home screen, tap  > .
All your contacts are listed in the **ALL CONTACTS** tab.
- 2 Tap the name of a contact to view their details.
- 3 Tap the phone number.
It calls the number at once. For more information, refer to *Making Calls on page 74*.

8.5.5 Messaging Contacts

- 1 On the Home screen, tap  > .
All your contacts are listed in the **ALL CONTACTS** tab.
- 2 Tap the name of a contact to view their details.
- 3 Tap .

8.6 Email

Use this app to send or view emails.

On the Home screen, tap  > . Enter your email address and password to set up your email account(s).

- To set up your email account(s) manually, tap **Manual setup**; to set them up automatically, tap **Next**. Follow the on-screen instructions to complete the setup.
- To add another account, tap  >  **Accounts** > **Add account**.

- To use web and data services, your device must be connected to the Wi-Fi or data networks. For more information on how to connect to networks, refer to *Wi-Fi on page 98* or *More Settings on page 114*.
- Using the Internet browser or downloading from the Internet via your data network may incur extra charges depending on your data plan.

8.7 Barcode

The EF400 includes a 2D barcode scanner. To use the barcode scanning function,

- 1 On the Home screen, tap > .
- 2 Tap **Open** to start scanning the barcode.
- 3 Press the Right or Left button. A red laser will come from the top of your device.

- 4 Aim the red beam across the barcode you want to scan.

When scanning, maintain a distance of about 10 cm or 4 in. for the best result and aim it at an appropriate angle as shown the following image.

Do not stare into the LED aimer of the barcode scanner. It may injure your eyes.

When the barcode is scanned successfully, you can hear a beep sound and the results will appear on the screen.

8.8 Snapdragon Camera

Use this app to take photos or record videos.

On the Home screen, tap > . You can also directly open the camera app from the lock screen. Swipe the screen to right while tapping .

- The first time you open the Camera app, you are prompted to add location tag to the photos and display the information.
- If micro SD card is installed, the photos and videos will be saved on the internal storage.

8.8.1 Taking Photos

- 1 On the Home screen, tap  >  and make sure that camera mode is set to .
- 2 Aim the camera at the object. To zoom in or out, spread or pinch two fingers on the screen.
- 3 Tap  to take a photo. You can hear a ding sound.
Your device automatically focuses on the object if the ZSL option is off and saves the photo on your internal storage.
- 4 Swipe the screen from the right edge to view the photos taken. To go back to the viewfinder, swipe the screen from the left edge.

8.8.2 Taking Photos in Panoramic Mode

- 1 On the Home screen, tap  > .
- 2 Tap  and select  to switch to panoramic mode.
- 3 Tap  to take a panoramic photo. You can hear a ding sound.
- 4 Pan slowly to the left or right. If you are moving too quickly, a message **“Too fast”** appears on the screen. A progress bar  is displayed on the capturing screen.
- 5 Tap  to end taking a panoramic photo. You can hear a ding sound.
A progress bar  indicates the photo rendering status. To cancel rendering, tap .
- 6 To view the photos taken, swipe the screen from the right edge. To go back to the viewfinder, swipe the screen from the left edge.

 The setting for taking panoramic photos are not available.

8.8.3 Recording Videos

- 1 On the Home screen, tap  > .
- 2 Tap  and select  to switch to video mode.
- 3 Aim the camera at the object and adjust the image. To zoom in or out, spread or pinch two fingers on the screen.
- 4 Tap  to record a video. You can hear a ding sound.
- 5 Tap  to stop recording. You can hear a ding sound.
Your device automatically saves the video on your internal storage.
- 6 To view the recorded videos, swipe the screen from the right edge. To go back to the viewfinder, swipe the screen from the left edge.

8.8.4 Camera Settings

You can modify various camera options. This camera settings menu can only be accessed through this app.

- 1 On the Home screen, tap  > .
- 2 Tap the flash status icon on the bottom right of the screen, or tap and hold the viewfinder to change the camera settings.
 - Tap  to enable the HDR feature, which takes multiple photos at different exposures and combines them into one vibrant photo. When you disable the HDR feature, the icon at the bottom right changes into .
 - If you want to turn off the HDR feature, tap  and the flash will operate automatically instead.
 - Tap  to switch between the front and rear cameras.
 - Tap ,  or  for more camera settings.
 - **Scene mode:** Tap to change the scene mode. You can select the mode among 19 modes.
 - **Store location:** Tap to select the checkbox to include location information for each photo using the device's GPS.
 - **Picture size:** Tap to select the size of photos in pixels.
 - **Histogram:** Tap to enable or disable the histogram. Histogram is a graph that shows the brightness distribution of a photo.
 - **Picture quality:** Tap to set the image quality. Higher quality images require more storage space.
 - **ZSL:** Tap to select the checkbox to turn on the ZSL option and to take a photo immediately after tapping . When this option is not selected, the camera will bring an image into focus before capturing it.
 - **Countdown timer:** Tap to set the timer to take photos automatically without tapping .
 - **Beep during countdown:** Tap to select the checkbox to set the beep sound while the timer counts down.
 - **Continuous shot:** Tap to select the checkbox to set continuous shooting mode to take multiple photos continuously by tapping and holding the .
 - **AUTO HDR:** Tap to enable or disable the auto HDR.
 - **HDR need 1x frame:** Tap to select the frame you used when you set the **AUTO HDR** in **Enable**. You can select **False** (single frame) or **True** (double frame).
 - **Color effect:** Tap to set the color effect for an image. You can select the effect among 10 effects.
 - **Face Detection:** Tap to select the checkbox to turn on or off the automatic face detection.
 - **Touch AF/AEC:** Tap to select the checkbox to set the touch AF/AEC. This allows you to set focus and exposure values when the focus and exposure area appears by tapping the viewfinder.
 - **Selectable Zone Auto Focus:** Tap to set a zone for auto focus.
 - **Select Picture Format:** Tap to select the photo format you want to save as.
 - **Saturation:** Tap to set the saturation level.
 - **Contrast:** Tap to set the contrast level.
 - **Sharpness:** Tap to set the sharpness level.
 - **Select Auto Exposure Mode:** Tap to set how light values are calculated. **Frame Average** measures the entire frame. **Center Weighted** measures the light in the center of the scene. **Spot Metering** measures the light value at a specific location.

- **Anti Banding:** Tap to set the anti banding feature to decrease fluctuations in the brightness of images. Set to a higher frequency for more light oscillation.
- **Select ISO:** Tap to set the ISO number. Use a lower ISO number to make your camera less sensitive to light and use a higher ISO number to take a photo in dark conditions.
- **Wavelet Denoise Mode:** Tap to select the checkbox to remove the wavelet noise from images.
- **Exposure:** Tap to set the exposure value. Increasing the exposure value will double the amount of light captured by the camera and decreasing the exposure value will half the amount of light captured by the camera.
- **White balance:** Tap to select a suitable light source for your photo.
- **Flash mode:** Tap to enable or disable the flash or make flash operate automatically.
- **Focus mode:** Tap to select a focus mode appropriate for the photo.
- **Redeye Reduction:** Tap to reduce the red-eye effect in photos which often occurs when the flash is used in dark conditions.
- **Manual Exposure:** Tap to adjust the exposure value manually.
- **Manual White balance:** Tap to adjust the white balance value manually.
- **Manual Focus:** Tap to adjust the focus value manually.

In HDR mode, you cannot set the **Continuous Shot, Color effect, Touch AF/AEC, Saturation, Contrast, Sharpness, Select Auto Exposure, Exposure, White balance, Flash mode and Focus mode.**

8.8.5 Video Settings

You can modify various video options. This video settings menu can only be accessed through this app.

- 1 On the Home screen, tap  > .
- 2 Tap  and select  to switch to video mode.
- 3 Tap the flash status icon on the bottom right of the screen, or tap and hold the viewfinder to change the video settings.
 - Tap  to switch between the front and rear cameras.
 - Tap  and  for more video settings.
 - **IS:** Tap to select the checkbox to set digital image stabilization IS, which reduces blurring in a video by compensating for hand tremor and other movements.
 - **Time lapse:** Tap to turn the Time lapse feature on or off. Turn it on to set a time interval.
 - **Video quality:** Tap to set the video quality.
 - **Video Encoder:** Tap to set the video encoder. The EF400 supports MPEG4, H263, and H264 video playback.
 - **Audio Encoder:** Tap to set the audio encoder. The EF400 supports AMRNB and AAC audio formats.
 - **Video duration:** Tap to set the video duration.
 - **Store location:** Tap to select the checkbox to include location information for each video using the device's GPS.
 - **Color effect:** Tap and set the color effect used in video.

8 Applications (for Android)

- **Video HDR:** Tap to select the checkbox to turn on the HDR feature, which takes multiple videos at different exposures and combines them into one vibrant video.
- **White balance:** Tap to select the most suitable light source for your video.
- **Video High FrameRate:** Tap to select a high frame rate for your videos. Videos recorded with a higher frame rate capture movement more clearly.
- **Flash mode:** Tap to select the checkbox to turn on or off the flash.

8.9 Calendar

Use this app to create, view, and manage events.

On the Home screen, tap  > . You can also add and tap a widget Settings on the Home screen.

To add events, you must set up an account. For information about how to set up an account, refer to [Accounts on page 120](#).

8.9.1 Creating Events

- 1 On the Home screen, tap  > .
- 2 Tap  > **Schedule, Day, 3 Day, Week** or **Month**.
- 3 In **Day, 3 Day** or **Week** view, tap a date or time to select it and tap it again to add events. If you try to add events in **Schedule** or **Month** view, tap a date and the screen will switch to **Day** view.
- 4 Tap the time and tap it again to add events.

You can also add events by tapping  at the bottom right of the screen in any view modes. Make sure you have to choose the date first.

8.9.2 Changing Calendar View

- 1 On the Home screen, tap  > .
- 2 Tap  and select one of the following options: **Schedule, Day, 3 Day, Week** or **Month**.
- 3 Tap today's date  on the top right of the screen.

8.9.3 Viewing Events

- 1 On the Home screen, tap  > .
- 2 Tap  > **Schedule, Day, 3 Day, Week** or **Month**.

Create and edit Word documents and share them with others.

8.13.12 Sheets

Create and edit Excel documents and share them with others.

8.13.13 Slides

View and edit PowerPoint documents and share them with others.

8.13.14 Voice Search

Search quickly for items by saying a keyword or phrase.

8.13.15 Google Settings

Configure settings for some features provided by Google.

9 Settings (for Windows)

Use this app to configure your Windows device.

On the Apps screen, tap **Settings**. You can also add and tap a tile Settings on the Start screen. Tap  and enter your search term to search the settings menu.

9.1 Network and Wireless

9.1.1 Wi-Fi

On the Apps screen, tap **Settings > Wi-Fi**.

Switch **Wi-Fi networking** to **On** to connect to a Wi-Fi network.

- Tap the available network to connect to it. If required, enter the password.
- Tap and hold the connected network to edit, disconnect, or delete.
- Tap **map nearby Wi-Fi** to view the map that shows the nearby Wi-Fi networks.
- Tap **Wi-Fi Sense** to save the cellular data and automatically connect to a nearby Wi-Fi network.
 - **Connect to Wi-Fi hotspots**: Switch this option to **On** to share your network with others.
 - **Share Wi-Fi networks I select**: Switch this option to **On** to share the network you selected with others.
- Tap **manage** and select the checkbox for sending information about Wi-Fi connections to detect nearby Wi-Fi networks.

9.1.2 Airplane Mode

On the Apps screen, tap **Settings > airplane mode**.

Switch **Status** to **On** to activate Airplane mode. All wireless and mobile services are disabled.

9.1.3 Bluetooth

On the Apps screen, tap **Settings > Bluetooth**.

Switch **Status** to **On** to turn on the Bluetooth feature and pair with other devices for information exchange.

- Tap the available device to pair with.
- Tap **advanced** and select the **Use an alternate Bluetooth audio connection for Speech** checkbox. Select this checkbox only if the devices you want to pair have issues with voice recognition.

9 Settings (for Windows)

9.1.4 Cellular Data and SIM Card

On the Apps screen, tap **Settings** > **cellular+SIM**.

Switch **Data connection** to **On** to connect to a mobile data network. If you connect the cellular data, it may incur extra charges.

- **SIM for data connection:** Tap drop-down list to select the SIM card to use for data connections.
- **Data roaming options:** Tap drop-down list to set the device to use data connections when roaming. If you select the **roam**, it may incur extra charges depending on your service agreement.
- **Highest connection speed:** Tap drop-down list to select the network service speed from **2G**, **3G**, or **4G**.
- **SIM settings:** Tap to configure the settings on the SIM card.

9.1.5 Data Sense

On the Apps screen, tap **Settings** > **data sense**.

Use these settings to use data connections more efficiently and check your data usage.

- **set limit:** Tap to view options about limiting your data usage.
 - **Limit type:** Tap drop-down list to select your calling plan.
 - **Days until data expires:** Tap drop-down list to select the remaining days until your data expires. This setting only appears if you select **one time** in **Limit type** setting.
 - **Monthly reset date:** Tap drop-down list to select the starting date of the data plan for every month. This setting only appears if you select the **monthly** in **Limit type** setting.
 - **Available data:** Tap **Available data** field to set the amount of data you can use manually. This setting only appears if you select **one time** in **Limit type** setting.
 - **Monthly data limit:** Tap **Monthly data limit** field to set a limit for the amount of data you can use in a month manually. This setting only appears if you select the **monthly** in **Limit type** setting.
 - **Units:** Tap drop-down list to select the data unit from **MB** and **GB**.
- **Restrict background data** and **Restrict background data when roaming:** Enable these options to always restrict the background data or only while roaming respectively.
- **Browser data savings:** Tap drop-down list to view options about conserving data when using the browser.
 - **off:** Tap and select to download the all web pages without any restriction.
 - **standard:** Tap and select to download the web pages with compressed pictures and to block ads.
 - **high:** Tap and select to download only some parts of web pages.
 - **automatic:** Tap and select to configure the optimum settings in accordance with the information you entered in the **set limit** menu.

9 Settings (for Windows)

9.1.6 Internet Sharing

On the Apps screen, tap **Settings > internet sharing**.

Switch **Sharing** to **On** to share the cellular data via Wi-Fi or Bluetooth.

- Tap **Share over** drop-down list to select the desired sharing method: **Wi-Fi, Bluetooth**.

- **browser captions**: Tap to configure the browser caption settings.
 - **Custom fonts and colors**: Switch this option to **On** to apply the user-defined font styles and colors.
 - **Font size**: Tap and move the slider to adjust the font size. The text size in the preview box will change accordingly.
 - **Font style**: Tap to select the font style.
 - **Text effects**: Tap to select the text effects such as **raised edge**, **depressed edge**, **outline**, or **drop shadow**.
 - **Font color**: Tap to select the browser font color used in the browser.
 - **Font transparency**: Tap to adjust the transparency of the font used in the browser.

9 Settings (for Windows)

- **Background color:** Tap to select the background color for the browser.
- **Background transparency:** Tap to adjust the transparency of the browser background.
- **Window color:** Tap to select the color of the browser window.
- **Window transparency:** Tap to adjust the transparency of the browser window.

9.6.2 Speech

On the Apps screen, tap **Settings > speech**.

Use this setting to configure the speech features.

- **Read aloud incoming text messages:** Tap to select when to read incoming messages aloud.
- **Text to Speech voice:** Tap drop-down list to select either a **male** or **female** voice.
- **Speech language:** Tap to select the language used in the speech feature. Select the following checkboxes in accordance with your situation.
 - **Allow speech above lock:** Select this checkbox to use the voice command feature when the device is locked.
 - **Improve recognition for non-native speakers:** Select this checkbox to improve the recognition rate of speech for non-native speakers.
 - **Enable Speech Recognition Service:** Send your recorded speech and supporting data to Microsoft or its partnering companies to improve their products and services.

9.7 Privacy

9.7.1 Location

On the Apps screen, tap **Settings > location**.

Use this setting to configure your location settings.

- **Location services:** Switch this option to **On** to provide your current location to any apps you have allowed to access your location information.
- **Show icon:** Select this checkbox to make the  icon mark your location in the apps that request your location.

9.7.2 Find My Phone

On the Apps screen, tap **Settings > find my phone**.

Use this setting to configure the settings used to locate your device.

You can configure this setting after adding the Microsoft account.

9 Settings (for Windows)

9.7.3 Advertising ID

On the Apps screen, tap **Settings > advertising id**.

Use this setting to send your unique ID to app developers and advertising networks to help them improve the quality of their service.

Switch **Advertising ID** to **On** to use this feature. If you want to clear all data from your advertising ID, tap **reset your advertising ID**.

9.7.4 Feedback

On the Apps screen, tap **Settings > feedback**.

Switch **Send feedback** to **On** to forward feedback to Microsoft or its partnering companies to improve their products and services. Feedback can be sent only if device is connected to a Wi-Fi network.

9.7.5 App Permissions

On the Apps screen, tap **Settings > app permissions**.

Use this setting to control which features an app is permitted to use. Tap each feature name and allow the app to use the selected feature by enabling it.

9.8 Update and Backup

9.8.1 Backup

On the Apps screen, tap **Settings > backup**.

Use this setting to back up the data stored on your device in the Cloud.

You can configure this setting after adding the Microsoft account.

9.8.2 Phone Update

On the Apps screen, tap **Settings > phone update**.

Use this setting to update your device and check the date of the last update.

- **check for updates:** Tap to check whether your device is up-to-date. After completion, a confirmation message will appear with the result.
- **Automatically download updates if my data settings allow it:** Select this checkbox to update your device automatically depending on data settings.
- **Preferred install time:** Tap to specify the time to install updates by tapping the hour, minute, and AM/PM.

9.9 Extras

9.9.1 Touch Setting

On the Apps screen, tap **Settings > touch setting**.

Tap **Glove mode** when you are using the device with gloves or **Normal mode** in according to your situation.

9.9.2 Button Setting

On the Apps screen, tap **Settings > button setting**.

Use this setting to assign a function to the Right and Left function buttons which have same shape. Tap **Right Button** or **Left Button** to assign one of the following three functions to them: **Barcode Scan**, **Push To Talk**, **Camera shutter**.

9.9.3 Scanner Setting

On the Apps screen, tap **Settings > scanner setting**.

Use this setting to configure the various types of barcode symbologies, making enable or disable to be scanned with the device.

9.9.4 Version Information

On the Apps screen, tap **Settings > Version Information**.

Use this setting to check the version information for your device. Swipe to the left or right to view information in the **COMMON**, **DRIVER**, and **DLL&SERVICE** tabs.

10 Settings (for Android)

Use this app to configure your Android device.

On the Home screen, tap . You can also add and tap a widget Settings on the Home screen. Tap  and enter your search term to search the Settings menu.

10.1 Wi-Fi

On the Home screen, tap  >  **Wi-Fi**.

Switch the Wi-Fi to **On** to connect to a Wi-Fi network.

- Tap and hold an available network to connect to it, remove it from the list, or modify its details.
- Tap  > **Add network** to add a network manually.
- Tap  > **Saved networks** to check the networks saved on your device.
- Tap  > **Refresh** to refresh the list of available Wi-Fi networks.
- Tap  > **Advanced** to customize Wi-Fi settings.

10.2 Bluetooth

On the Home screen, tap  >  **Bluetooth**.

Switch the Bluetooth to **On** to activate it and pair with other devices for information exchange.

- Tap the available device to pair with.
- Tap  > **Refresh** to refresh the list of available Bluetooth devices.
- Tap  > **Rename this device** to change the name of your device manually and to set the length of time for your device to appear on the search list.
- Tap  > **Show received files** to show all files received via Bluetooth.

10.3 Ethernet

On the Home screen, tap  >  **Ethernet**.

Select the **Ethernet** checkbox to activate the Ethernet function.

- Tap **Ethernet configuration** after activating the Ethernet function to configure the Ethernet device's settings.

10.4 Data Usage

On the Home screen, tap > **Data usage**.

Turn **Cellular data** on to use the cellular data for mail app, GPS, etc.

- Turn **Set cellular data limit** on to make your device turn off cellular data once it reaches the set limit. The orange bar appears in graphs on the screen.
- Tap > **Restrict background data** to restrict the use of some apps and services unless your device is not connected to a Wi-Fi network.
- Tap > **Show Wi-Fi** to display the **WI-FI** tab in this settings menu. If you want to hide the **WI-FI** tab, tap **Hide Wi-Fi**.
- Tap > **Network restrictions** to restrict the use of apps in the background when connected to a Wi-Fi network. The app may warn you before using these networks for large downloads.
- Tap > **Cellular networks** to configure **SUBS Settings**.

10.5 More Settings

Use this menu to change more wireless and networks settings for interaction with other devices.

On the Home screen, tap > **More**.

- **Airplane mode:** Tap to start Airplane mode. All wireless and mobile services are disabled when Airplane mode is activated.
- **Default SMS app:** Tap to specify a default SMS app among various SMS apps in your device.
- **NFC:** Tap to turn on the NFC feature to allow data exchange by bringing two devices into close proximity.
- **Android Beam:** Available only when the NFC feature is activated.
- **Tethering & portable hotspot**
 - **USB tethering:** Use USB tethering to share the data connection with a computer via USB.
 - **Portable Wi-Fi hotspot:** Use the portable Wi-Fi hotspot to share the data connection through the Wi-Fi network.
 The Portable Wi-Fi hotspot feature requires more battery power and increases your data usage. It may incur extra charges depending on your data plan.
- **Set up Wi-Fi hotspot:** Tap to specify the Wi-Fi hotspot settings.
 - **Bluetooth tethering:** Use Bluetooth tethering to share the data connection with a computer via Bluetooth.
- **VPN:** Tap to set up and edit virtual private network (VPN) profiles and connect to the VPNs.
 You need to set a screen lock pattern, PIN, or password before using the VPNs. For information on how to set up a lock screen, refer to *Security on page 118*.
- **Cellular networks:** Configure **SUBS Settings**.
- **Mobile plan:** Tap to change mobile network settings.

10.6 Display

Use these Display settings to change the screen brightness and wallpaper, enable screen rotation, set the sleep time, change the font size, and configure other features of the display.

On the Home screen, tap  >  **Display**.

- **Brightness level:** Tap and move the slider to adjust the screen brightness.
- **Adaptive brightness:** Enable this option to set your device to automatically optimize the brightness level for available light.
- **Wallpaper:** Select an image for the Home screen background.
 - **Live Wallpapers:** Animated wallpaper image installed on your device
 - **Photos:** Photos taken by your device's camera or downloaded from the Internet
 - **Wallpapers:** Images saved on your device
- **Sleep:** Tap and select the length of time the device waits before turning off the screen and locking itself.
- **Daydream:** Tap and switch this option to **On** for the device to show the clock, colors, photo frame, photo table, or photos while the device is locked, charging, or locked and charging.
 - Tap to select a desired action.
 - Tap **Start now** or **When to daydream** to set when to use this feature.
- **Font size:** Tap to change the font size.
- **When device is rotated:** Tap and select one from two options: **Rotate the contents of the screen**, **Stay in current orientation**.
- **Cast screen:** Tap to mirror your device's screen to a TV or similar device when the Miracast dongle or Chromecast dongle is detected.

10.7 Sound and Notification

Use this Sound settings to configure sound settings such as the call ringtone or system notification volume. On the Home screen, tap  >  **Sound & notification**.

Sound

- **Media volume:** Tap and move the slider to adjust the volume of media.
- **Alarm volume:** Tap and move the slider to adjust the volume of the alarms.
- **Ring volume:** Tap and move the slider to adjust the volume of ringtones.
- **Also vibrate for calls:** Turn on this option to set your device to vibrate for incoming calls.
- **Interruptions:** Tap to set your device to disable notifications while using selected apps.
 - **When calls and notifications arrive:** Tap to select the interruption options during a call.
 - **Events and reminders:** Turn on this option to put priority on this menu when other notifications arrive.
 - **Calls:** Turn on this option to put priority on this menu when other notifications arrive.
 - **Messages:** Turn on this option to put priority on this menu when other notifications arrive.
 - **Call/message from:** Tap and select the sender group you want to put priority when other notifications arrive during a call or message.
 - **Downtime:** Set your device to only sound or vibrate for select notifications during a set time. Tap **Days**, **Start time**, **End time** and **Interruptions allowed** to configure the downtime.

 **Alarms are always priority interruptions.**

- **Phone ringtone:** Tap to select a ringtone to alert you of incoming calls. Tap on a ringtone to hear it. If you decide to set it as a ringtone, tap **OK**. If not, select another ringtone or tap **CANCEL**.
- **Default notification ringtone:** Tap to select a notification sound to alert you of system notifications. Tap on a sound to hear it. If you decide to set it as a notification sound, tap **OK**. If not, select another sound or tap **CANCEL**.
- **Other sounds:** Tap to set other sound options except the ringtone and notification sounds.
 - **Dial pad tones:** Turn on this option to set your device to emit a sound when you tap the keypad.
 - **Screen locking sounds:** Turn on this option to set your device to emit a sound when you unlock or lock the screen.
 - **Touch sounds:** Turn on this option to set your device to emit a sound when you tap the screen.
 - **Vibrate on touch:** Turn on this option to set your device to vibrate when you tap soft keys or during certain screen interactions.

Notification

- **When device is locked:** Tap and select the notifications to display when the device is locked.
- **App notifications:** Tap and select the app that you want to block or put priority for its notification.
- **Notification access:** Tap to enable or disable notifications while using an app that supports the alarm access.

10 Settings (for Android)

10.8 Storage

You can check the internal or SD card storage space. Tap **Erase SD card** to delete all data saved on the SD card.

On the Home screen, tap  >  **Storage**.

10.9 Battery

Use these Battery settings to monitor battery usage.

On the Home screen, tap  >  **Battery**.

You can check:

- Battery charging status
- How long your device has been running on battery power
- Tap  > **Battery saver** to improve the battery life.

10.10 Apps

You can check the status of all apps in your device using the **DOWNLOADED**, **ON SD CARD**, **RUNNING**, and **ALL** tabs.

On the Home screen, tap  >  **Apps**.

- **Sort by size:** Tap to sort the apps by size, starting with the biggest one.
- **Sort by name:** Tap to sort the apps into alphabetical order.
- **Reset app preferences:** Tap to reset app's preferences to the default settings.
- **Preferred install location:** Tap to set the preferred installation location for new apps.
- **Show cached processes:** Tap to show the cached processes of apps.
- **Show running services:** Tap to only show the running services and apps.

10.11 Peripheral Device

Use this peripheral device settings to activate or deactivate the DataWedge mode and select the Key Scan/PTT format.

On the Home screen, tap  >  **Peripheral Device**.

10.12 Users

Use this User settings to manage users of your device.

On the Home screen, tap  >  **Users**.

- Tap **Add user** to add other users.
- Tap  and select the checkbox for **Add users when device is locked** to add other users when the device is locked.

10.13 Location

Switch this option to **On** to detect your device's location.

On the Home screen, tap  >  **Location**.

- **Mode:** Tap and select the method for determining your location such as GPS, Wi-Fi and cellular networks, or Qualcomm® IZat™ hardware.

10.14 Security

Use this Security settings to set a lock screen and change settings to secure your device.

On the Home screen, tap  >  **Security**.

Screen security

- **Screen lock**
 - **None:** The screen is unlocked at all times. When you press the Power button, the Home screen appears.
 - **Swipe:** Drag the lock icon to unlock the screen.
 - **Pattern:** Draw a pattern to unlock the screen.
 - **PIN:** Enter a PIN to unlock the screen.
 - **Password:** Enter a password to unlock the screen.
- **Make pattern visible:** Turn on this option to make the pattern visible when it is drawn.
- **Automatically lock:** Tap to select the length of time the device waits before turning off the screen and locking itself.
- **Power button instantly locks:** Turn on this option to enable the Power button to lock the device instantly.

When you set the pattern, PIN, or password lock screen, the above three options appear.

- **Owner info**
 - **Show owner info on lock screen:** Tap and select the checkbox to display the owner information on the lock screen. Then enter text to display. If you do not select the checkbox, the input field will be deactivated.

10 Settings (for Android)

• Smart Lock

- **Trusted devices:** Add a trusted device to keep your device unlocked when connecting via Bluetooth or NFC.
- **Trusted places:** Add a trusted place to set your device to unlock when it is in select locations.
- **Trusted face:** Add a trusted face to unlock your device when it recognizes the user's face.
- **Trusted voice:** Add a trusted voice to unlock your device when it recognizes the user's voice.
- **On-body detection:** Set your device to unlock when you hold or carry it in your hands. Your device will lock when it detects that it has been laid down.

Encryption

- **Encrypt phone:** Tap to encrypt your accounts, settings, downloaded apps and their data, and other files. Set a numeric PIN or password for encryption. You must enter the password each time you turn on the device.

You can only decrypt the device by performing a factory reset. Encrypting your device may take more than an hour. Charge your battery before encrypting, and keep your phone plugged in until encryption is complete. If not, you may lose some or all of your data.

SIM/RUIM card lock

- **Set up SIM/RUIM card lock:** Tap and set to lock your SIM or RUIM card with its PIN.

Passwords

- **Make passwords visible:** By default, the device hides passwords for security when you enter them. Turn on this option to make the passwords visible as they are entered.

Device administration

- **Device administrators:** Tap to manage device administrators.
- **Unknown sources:** Turn on this option to allow your device to install or download apps from unknown sources.

Credential storage

- **Trusted credentials:** Tap to enable or disable the trusted system CA certificates.
- **Install from SD card:** Tap to install certificates from the SD card.
- **Clear credentials:** Tap to delete all certificates.

Advanced

- **Trust agents:** Tap to enable or disable trust agents.
- **Screen pinning:** Tap to disable or enable screen pinning.
- **Apps with usage access:** Tap to manage which apps are allowed access to app usage data.

10.15 Accounts

Use this settings to manage accounts of your device.

On the Home screen, tap  >  **Accounts**.

- Tap **Add account** to add other accounts.
- Tap  and select the checkbox for **Auto-sync data** to sync the data automatically.

10.16 Language and Input

Use this Settings menu to change language and input method.

On the Home screen, tap  >  **Language & input**.

- **Language:** Tap and select the default language for all menus and apps.
- **Spell checker:** Turn on this option to enable the spell checker and configure its settings and language.
- **Personal dictionary:** Tap to view and add words to your personal dictionary.

Keyboard & input methods

- **Current Keyboard:** Tap to view the current keyboard you are using. Tap **CHOOSE KEYBOARDS** to select a different keyboard to use.
- **Google Keyboard:** Tap to configure the Google keyboard settings.
- **Google voice typing:** Tap to configure the Google voice typing settings.

Speech

- **Voice input:** Tap to select either the basic or enhanced voice input service.
- **Text-to-speech output**
 - **Preferred engine:** Tap to select a speech synthesis engine. To change its settings, tap .
 - **Speech rate:** Tap to select the speed at which the text is spoken.
 - **Listen to an example:** Tap to listen to a short part of the spoken text.

Mouse/trackpad

- **Pointer speed:** Tap and move the slider to adjust the pointer speed for the mouse or trackpad that is connected to your device.

10 Settings (for Android)

10.17 Backup and Reset

Use this Settings menu to perform factory reset.

On the Home screen, tap  >  **Backup & reset**.

Backup & restore

- **Back up my data:** Turn on this option to back up app data, Wi-Fi passwords and other data to Google servers.
- **Backup account:** Tap to select the account where you want to backup the data.
- **Automatic restore:** Turn on this option to reinstall the apps, and restore backed up settings and data.

Personal data

- **Factory data reset:** Tap **RESET PHONE** to delete all data from the device's internal storage. The device turns off and then reboots automatically.

10.18 Date and Time

Use this setting to manage the date and time settings.

On the Home screen, tap  >  **Date & time**.

- **Automatic date & time:** Turn on this option to set the date and time automatically in accordance with the network-provided time.
- **Automatic time zone:** Turn on this option to set the time zone automatically in accordance with the network-provided time zone.
- **Set date:** Tap to set the date manually by tapping the date on the on-screen calendar. You can navigate through the calendar by swiping up and down.
- **Set time:** Tap to set the time manually by tapping the time on the on-screen clock.
- **Select time zone:** Tap and select the time zone manually.
- **Use 24-hour format:** Turn on this option to use 24-hour format. If turned off, the device uses the 12-hour format with AM/PM notation.

10.19 Accessibility

Use this setting to customize your device to improve its accessibility.

On the Home screen, tap  >  **Accessibility**.

- **TalkBack:** Tap and switch this option to **On** to set your device to provide spoken feedback to help blind and visually impaired users.
- **Switch Access:** Tap and switch this option to **On** to control your device using configurable key combinations.

10 Settings (for Android)

- **Captions:** Tap and switch this option to **On** to make captions appear on the bottom of the screen. You can set the language, text size, and caption style.
- **Magnification gestures:** Tap and switch this option to **On** to zoom in and out by triple-tapping the screen. You can also temporarily magnify screen content by triple-tapping and holding it.
- **Large text:** Tap and turn on this option to enlarge the text size.
- **High contrast text:** Tap and turn on this option to fix the text color as black or white to make it easier to read.
- **Power button ends call:** Tap and turn on this option to end the call by pressing the Power button.
- **Auto-rotate screen:** Tap and turn on this option to make the screen rotate automatically when you move the device between landscape and portrait orientation.
- **Speak passwords:** Tap and turn on this option to set the device to read passwords aloud as you enter them.
- **Accessibility shortcut:** Tap and switch this option to **On** to enable accessibility features quickly from the accessibility shortcut.
- **Text-to-speech output**
 - **Preferred engine:** Tap to select a speech synthesis engine. To change its settings, tap .
 - **Speech rate:** Tap to select the speed at which the text is spoken.
 - **Listen to an example:** Tap to listen to a short demonstration of the spoken text.
- **Touch & hold delay:** Tap and select the length of time required before your device detects that the user is touching and holding the screen.
- **Touch Type:** Tap and select your preferred method to interact with your device, such as with gloves or pens.
- **Color inversion:** Tap and turn on this option to invert the colors on the screen.
- **Color correction:** Tap and switch this option to compensate for color blindness. You can also select the correction mode for each type of color blindness.

10.20 Printing

Use this setting to print documents from your device directly with app that support the Wi-Fi or Cloud printing feature. You can specify the default printer.

On the Home screen, tap  >  **Printing**.

10.21 About Phone

Use this Settings menu to view the following information about your device: **Status**, **Legal information**, **Model number**, **Processor info**, **Android version**, **Kernel version**, and **Build number**.

On the Home screen, tap  >  **About phone**.

Physical Characteristics

Dimensions (W x H x D)	68 X 136 X 15.4 mm
Weight	200 g (with battery)
Display	5-inch HD Gorilla Glass 3 Display; 800 X 480 pixels
Standard battery	Rechargeable, 3.8 V, 3,010 mAh, Li-ion
Extended battery	Rechargeable, 3.8 V, 6,020 mAh, Li-ion
Expansion slot	Customer-accessible microSD slot for removable memory cards with a capacity of up to 64 GB
SIM/SAM slot	1 SIM
Audio	VoWWAN; VoWLAN; PTT ready; Headset jack; dual microphone support with noise cancellation; support for wired / wireless headsets
Camera	Main (Rear): 13 megapixel auto-focus camera with LED flash Sub (Front): 1.3 megapixel front camera for video conference
Barcode scanner	2D Imager
GPS	Integrated GPS

Performance Characteristics

Processor	1.2 GHz Quad Core Processor
OS (optional)	Android 5.1 (Android 6.0 upgradable) or Windows Embedded 8.1 Handheld (Windows 10 IoT Mobile Enterprise Upgradable)
System memory (optional)	2 GB RAM
Built-in storage (optional)	8 GB or 16 GB
Interface	Docking connector; Micro USB

User Environment Characteristics

Durability	TankSmith™ Technology
Operating temperature	-20°C to 60°C (-4°F to 140°F)
Storage temperature	-25°C to 70°C (-13°F to 158°F)
Humidity	95%, non-condensing

Communication Options

WWPN Radio (optional)	LTE, HSPA+/HSPA/UMTS, EDGE/GSM, CDMA
WLAN Radio (optional)	802.11 a/b/g/n (802.11n 2.4 GHz and 5 GHz) Indoor use only in 5150 MHz ~ 5250 MHz band.
WPAN Radio (optional)	Bluetooth Class I V4.0

Please ask your sales representative for the specifications not listed above or for the future upgradeable specifications.

Cradles

- 1-slot charging cradle: One charging slot for a handset, one charging slot for a spare battery, one micro USB port
- 4-slot charging cradle: Four charging slots for handsets, four charging slots for spare batteries, one micro USB port
- 1-slot Ethernet cradle: One charging slot for a handset, one charging slot for a spare battery, one micro USB port, Ethernet port
- 4-slot Ethernet cradle: Four charging slots for handsets, four charging slots for spare batteries, one micro USB port, Ethernet port

The power adapter, AC power plug and AC power cable require the use of charging cradles.

Batteries/Battery Covers

- Standard battery: 3,010 mAh
- Standard battery cover
- Extended battery: 6,020 mAh
- Extended battery cover

Vehicle Accessories

- Vehicle charger
- Vehicle mounting cradle

Scanning Accessories

- RFID sled

Carrying Accessories

- Holster

Other Accessories

- Stylus pen
- Protective film
- Adapter plug (220 V)
- Power adapter for direct charging
- Pistol grip
- User manual
- Quick guide

The battery does not charge properly.

- Ensure that your device and the charging cable are connected and the charging LED is functioning correctly.
- If the battery does not charge completely, it may be dead or defective. Replace the battery with a new one. (The warranty period for battery replacement is six months.)

The battery life got shorter.

When you use network data or peripheral device such as wireless LAN or Bluetooth that require more power, your device may use more battery than usual. If it happens for an extended period of time, your battery may be dead. Then replace it with a new battery.

I dropped the device in the water.

Turn off the device and take out the battery. Place the device and battery in a dry place. Let them dry completely for a considerable period of time, and then turn the device back on. If it does not turn back on, contact our service center.

My device gets too hot to touch.

It is normal for the device to warm up while it is receiving a poor signal, performing an intense workload, or charging. It should cool down if you stop using the device for a certain amount of time. If the problem continues, contact the manufacturer. It may result in a burst battery or fire.

How do I get the repair service?

You can contact your local sales representative or you can send the device via a delivery service to Bluebird's Korean headquarters. When sending the package, make sure you pay for the shipping fee in advance. When the repair is finished, Bluebird will cover the shipping cost.

FCC compliance information

This device complies with Part 15 of the FCC's Rules. Operation is subject to the following two Conditions:

- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesirable operation.

This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference.

End users cannot modify this transmitter device. Any Unauthorized modification could void the user's authority to operate this device.

Part 15.105 (B)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment under FCC rules.

IEC 60417-6044

Do not listen to sound at high volume for long periods. It may cause hearing damage. Also, only use compatible receiver, headphones, or earpieces with your device.

CE

Hereby, Bluebird Inc. declares that this EF400 is in compliance with the essential requirements and other relevant provisions of directive 1999/5/EC.

To comply with CE RF exposure requirements, the handset must be kept 0.59 inches (1.5cm) from the body without any reference to a particular side or edge.

Any beltclips, holsters, and similar accessories containing metallic components may not be used.

Body-worn accessories that cannot maintain 0.59 inches (1.5cm) separation distance between the user's body and the handset, and have not been tested for typical body-worn operations may not comply with CE RF exposure limits and should be avoided.

European Union (EU) Waste of Electrical and Electronic Equipment (WEEE) directive

According to the European Union's WEEE directive, this symbol means that products sold into EU countries must dispose electrical device and/ or its battery separately from household waste. Disposing of the device separately will help conserve resources and energy and contribute to human health and environment protection.

Customers or end-users in EU countries should contact their local equipment supplier representative or service centre for information about the waste collection system in their country.

Warranty certificate

Thank you for purchasing a product from Bluebird Inc.

- In case of accessories such as batteries, only those that match the sales list managed by the Customer Service Center will be eligible for customer service.
- A repair or an exchange of batteries that does not match the sales list of the Customer Service Center due to the carelessness of the customer will be fully charged.

Name of Product	
Name of Model	EF400
Date of Purchase

Place of Purchase	
Term of Guarantee	1 year from purchase

Warranty information

- Bluebird Inc. (hereinafter referred to as Bluebird) provides the warranty service for its products in compliance with the Bluebird's warranty program.
- Upon receiving a notification on a defect of its product within the range of warranty during the warranty period, Bluebird will repair or replace the defective product according to its warranty policy.
- If the defective product within the range of warranty is not repairable or replaceable, Bluebird shall refund the purchasing price within a designated period from the date of receiving a notice of defect.
- Bluebird assumes no responsibility for repairing, replacement or refund until it receives the defective product from the customer. The replacement shall be equivalent to a new product in the aspect of performance.
- Bluebird products may contain the recycled products, components or materials equivalent to new products in the aspect of performance.
- This warranty is applied to software products only when the programming commands are not executed. Bluebird does not guarantee interruption-free or error-free performance.

Customer support

Before asking for after-sales service, please back up the data on the device. We do not back up data from the products sent to the Customer Service Center. Therefore, we assume no responsibility for loss/deletion of data.

Registering for After-Sales Service

- We receive the products for our after-sales service through mail, delivery services and hand delivery only in principle.
- If you bought the product from a party other than Bluebird or an authorized Bluebird reseller, you need to register the product before using our after-sales service.
- Please enclose an evidence of purchase or the product receipt for our after-sales service.
- Please enclose your name, telephone number, address and details of the problem for a prompt service.
- You can ask for our after-sales service by contacting your authorized Bluebird dealer or the Customer Service Center in the head office.
- Do not intentionally damage the label on the product.
- A damaged label may result in a disadvantage to the customer.
- When you return the product to Bluebird for service, please put the product in a protective box.
- The warranty will not cover any damage which occurs during delivery. We advise you to use the box and protective cover supplied with the product.
- Make sure to deliver the product in a safe way. Bluebird assumes no responsibility for the loss of the product during delivery.

Charged services

- In the following cases, it will be charged when requesting for after-sales service.
 - Service request due to inappropriate use of the device by the customer
 - Loss of PIN number
 - Use of programs that might affect the program (over-clock, forceful changes in the input of the system, personal developments)
- Faults caused by the customer.
 - Defect due to inappropriate or careless use of the product (dropping, submersion under water, shock, damage, unreasonable operations, etc.)
 - Defect due to a repair or unauthorized technician
 - Defect caused intentionally or by the carelessness of the customer
 - Defect due to the use of fraudulent parts or components
- Other cases
 - Defect due to nature (damage caused by fire, wind, flooding, etc.)
 - Accessories are out of warranty (accessories like battery/charger/cable/adapter, etc. have a warranty of 6 months)
- Regulations for repairs after charged services
If the same fault occurs in the part that has been repaired within a 1 month (30 days), the part will be repaired free of charge.

No refunds will be offered in the following situations:

- The product seal has been removed (if applicable).
- The product has been damaged due to careless use by the customer or due to a natural disaster (floods, rain, fire, etc.).
- Loss of product or other components (manual, connecting cables, etc).
- DOA (Dead on Arrival) policy
If your product is DOA (Dead on Arrival), or has malfunction within 30 days of purchase (DOA period), the product will either be exchanged or provided with after-sales service.
