

The benefits of this product are numerous.

1. It is very easy to apply
2. The first thing observed is the breath improved by 45-85% 2 days into the study.
3. The benefits of this product was observed and showed an avg. of 4.5-6.7% improvement daily
4. A bacteria study was completed before and after the application again showing a marked 22% decrease in bacteria after the application.
5. The test subjects we used in the study had never had their teeth cleaned, (as you can see in the before and after pictures most were in very much need of a professional cleaning) and all showed improvement.

In summation, all 5 subjects used in this test passed and the results were consistent. We did use the product 2 times per day and we are sure this accelerated the results without ill effects.

Dr. Rolly Junanito Cierza DVM
San Marcos University - Lima Peru
Tanith Pena Araujo
Director of Amazon Cares

Amazon Cares has 3 on staff Veterinarians and 3 full time Veterinarian Technicians. The director of Amazon Cares Tanith Pena Araujo studied extensively at the National University of Peru Amazon. Her studies include all types of animals but her main interest was in dogs and cats and she became an advocate to save homeless animals in the Loreto Jungle which eventually lead her to become the director of Amazon Cares.

PetzLife and VetzLife thanks everyone involved in getting this important study completed.

Sincerely, Bud Groth, Owner CEO
